Vol. 36 No. 4 July 2021

CONTENTS

- Applied research of decoupling combustion in pulverized coal industrial boilers equipped with high-speed burner
..... *CHEN Long, WANG Naiji* (1)
- Numerical simulation of influence of boundary condition on powder mixer *LIU Zhenyu* (8)
- Situation analysis and development trends overview of central heating steam heating network design
..... *ZENG Xin* (16)
- Oxygen content prediction of pulverized coal-fired industrial boiler flue gas based on SVR
..... *YANG Jinfang* (24)
- Effects of carbon deposition time on carbon molecular sieves for purification of coal-bed methane
..... *FU Xiang* (30)
- Study on gasification characteristics of Guizhou high ash fusibility semi coke under CO₂ atmosphere
..... *XU Chunxia* (35)
- Development and performance evaluation of high-efficiency super-concentrated hydraulic fluid for
mine support *HOU Jiantao* (42)
- Premium analysis for changing raw coal from steam coal to coking clean coal in Huainan *HUANG Jie* (47)
- Study on control methods of ash melting temperature of Jincheng anthracite *YANG Lichao* (51)
- Analysis of coke deterioration and quality requirements under blast furnace injection *LIU Yunxian* (57)
- Technology and research on automatic judgment of drying end condition of coal sample *HUANG Zhikun* (64)
- Research on change law of impact from coal flow to cutting bucket in middle belt sampling
..... *WANG Yangyang* (72)
- Comparative study on two methods for determination of mercury in coal
..... *CHAI Wen, FU Kun, CHEN Sihan* (77)
- Comparison of infrared spectroscopy and Coulometric titration for determination of total sulfur
..... *LV Jiadong, ZHANG Jing, WANG Jian, et al* (83)
- Research on the practice of quality standardization management of coal sampling and sample preparation
..... *WANG Huayang* (87)
