MAIN CONTENTS

Characteristics and Problems of Chinese farmer's Burden in the New Era and Countermeasure

Suggestions *HUANG Weijian, WANG Huiping and LIANG Hao*(4)

New changes on Chinese farmer's burden in the new era have taken place. To fundamentally solve this problem, reform of the relevant management systems and mechanisms must be speeded up, the strategic idea of "to promote agriculture through industry, to bring along rural area by urban area" must be taken into effect; sound system of agricultural protection must be established to earnestly solve the outstanding problems on farmer's burden; national income distribution structure must be adjusted to expand the coverage of public finance in rural areas; the legislation process on farmer's burden monitoring and management must be speeded up to establish the long-term effective mechanism; to promote equal "national treatment" on urban and rural residents on state tax revenue bearing and access to government public services.

Protecting the Interests of Farmers and Improving the Transaction Mechanism: the Experience from

the Mode of "Homestead-house Exchange" in Tianjin *ZHANG Hongxing and SANG Tiezhu*(10)

Rural Sanitation Resource Allocation: Based on the Experience in Sichuan Province

..... *LI Xiaoyan*(16)

Comprehensively Upgrade the Dairy Industry in China through Promoting the Development of

Alfalfa Industry *WANG Mingli*(22)

Evaluation on the Agricultural Modernization in Guangdong: 1999-2007 *FU Chen*(26)

Analysis on Rural Household's Game Behavior Characteristic in the Agricultural Land Circulation

of "Reverse Rent through Inverse Contract" *WANG Yanqi and GUO Xiangyu*(34)

The Socialized Farmers of China and the Circulation of Farmland *WANG Yinmei*(45)

The overwhelming majority of farmers in China are still petty farmers now, but they are highly socialized farmers, they bear a huge expenditure pressure, their motivation is to maximize monetary income. The rational choices of Chinese petty farmers on the basis of this goal had greatly hindered the circulation of farmland. Measures must be taken to ease the farmers' expenditure pressure and weaken the welfare and security features of land in order to solve the problems of the circulation of farmland.

Technical Factor Analysis of Rural Labor Migration: Based on Empirical Research in Jinhu,

Jiangsu Province *WU Jianhua and CHU Baojin*(50)

Research on Government-Induced Mechanism of Chinese Agricultural Insurance

..... HUANG Yingjun(56)

Based on the economics of public regulation point of view , the author has a more systematic study on the government-induced mechanism of China's agricultural insurance. From the expansion of business scope , management and technological innovation, the establishment of the agricultural fund catastrophe losses , the effective supply of agricultural re-insurance, opening agricultural insurance market level, it probes into main body constructing China's agricultural insurance Government- Induced mechanism, and then explores the mechanism of constructing government-induced Agricultural Insurance in China , in order to provide theoretical support and policy recommendations to ease the "market failure" phenomenon in China's agricultural insurance.

The Strategic Significance of Developing Winter Fallow Farmland in Southern China and Seasonal Scale Management Mode and Development Strategy TAN Shuhao(62)

Study on the Fertilizer Inputs Based on China's Food Security

..... ZENG Jing ,CHANG Chunhua and WANG Yapeng(66)

Reflection on the Development of "Law of the Rural Collective Economic Organizations" in China: Case of Dujiangyan City,Sichuan Province ZHANG Yunhua(71)

A puzzling phenomenon exists in China's laws and regulations relating to the rural collective economy , that is , on the one hand the rural collective economic organizations of the legal status and rights is clear and explicit, on the other hand, the definitions of the rural collective economic organizations, specific forms, how to set up , how it works, how to manage, to participate in economic activities, and legal status are not stipulated, so that the rural collective economic organizations have neither real anonymous nor reality. To promote the rural collective economic development, to protect the collective interests of the farmers to adapt to the rural social change, the formulation of "rural collective economic organization Act" is needed currently.

Research on Farmland Property Rights Structure Innovation of Luyanghu Farmland Share

Cooperatives JI Xianqing and QIAN Zhonghao(77)

Farmland property rights structure includes integrity and completeness. Different farmland property rights structure with different incentive and restrict effects would result in varied institutional performance. The success of farmland share cooperatives of Luyanghu village not only determined by maintaining integrity but also improving completeness of farmland property rights. The enlightenment of innovation of farmland property rights structure of Luyanghu farmland share cooperatives is that the future China farm-

land property rights structure innovation should further perfect farmland property rights structure.

The Responsibility of the State-owned Agricultural Enterprises: Based on the Perspective of

Technology Innovation and Diffusion YU Difei(84)

Game Analysis of the Subject Behaviors and Policies of State-owned Forestry Property Right

Reform in Yichun, Heilongjiang Province CAO Yukun, CHEN Jiancheng and CHEN Lirong(89)

On the basis of a spot research on the Yichun state-owned forestry right reform experiment bureaus (fields), this paper constructs a game model, and makes a quantitative analysis of the game situations between stakeholder behavior of the state-owned forest right system reform and issue policies of the forest property right certification. Research shows that: When the forestry reform households (forestry workers) need life funds urgently, they will apply for mortgage loans and transfer standing trees to raise funds if the Government issues forestry right certificate; they will be taken cut the immature trees to raise funds if the government dose not; When the forestry reform households (forestry workers) don't need life funds, they will cut only mature trees to receive the greatest economic benefit regardless of whether the Government is issuing forest right certificates. In a word, the two-side game results show that no matter whether the forestry reform households need funds urgently or not, issuing forestry right certificate can maximize the interests of state and families.

The Effects of Green Barriers in Agricultural Trade and Countermeasures DING Changqin(96)

Learning Successful Experience from Advanced Countries to Increase Jiangsu's Competition

Capability in Agro-product Export ZHANG Yulan(99)

Study on the Competitiveness of the U. S. Corn Industry and its Inspiration on the Development

of China's Corn Industry ZHANG Bin(103)
