# 水动力学研究与进展

第 37 卷第 1 期 2022

CHINESE JOURNAL OF HYDRODYNAMICS

Vol.37 No.1 2022

## 目次

## 学术论文

- 不同工况下无轴泵喷推进器间隙流动损耗特性数值分析  
韩承灶, 阮华, 洪方文, 季斌 ..... (1)
- 整流罩对长柔性立管的涡激振动抑制的数值模拟  
肖宏宇, 李芙蓉, 孙铭伯, 孙雷 ..... (10)
- 喷水推进一体式操舵倒航机构中方向舵受力的 CFD 研究  
王俊, 李贵斌, 张岩, 刘雪琴 ..... (21)
- 非均匀体积压裂水平井压力动态分析  
孟凡嵩, 尹洪军, 袁鸿飞, 付京, 代立 ..... (28)
- 低雷诺数  $60^\circ$  交叉双圆柱直接数值模拟研究  
张嶷, 王杰, 梁丙臣, 杨青青, 唐也婷 ..... (35)
- 新型人造植被水流中的能量平衡机理研究  
张皎, 王雯, 邱虎楠, 李占斌 ..... (42)
- 柱型旋流器内油-水两相流的流场特征和分离性能  
朱沫, 欧宇钧, 吴辰, 吴奇霖, 张健, 许晶禹 ..... (49)
- 不同介质条件下航空液冷泵空化特性的数值模拟及实验研究  
李志, 张德胜, 赵睿杰, 王飞 ..... (56)
- 逆流对不规则波中畸形波波影响实验研究  
夏维达, 董国海, 马玉祥, 陈卓 ..... (66)
- 新型对称折板式竖井水力特性  
陈璐, 陆迎香, 唐洪武, 闫静 ..... (73)
- 斜坡地形上正向、斜向和多向不规则波统计特征参数研究  
徐嘉忆, 柳淑学, 李金宣, 贾伟 ..... (84)
- C 型槽参数对 NACA0009 翼型间隙流动的影响  
吴广宽, 王浩洋, 罗兴铸, 冯建军, 闫思娜 ..... (93)
- 海船闸气幕防咸数值模拟研究  
常聪聪, 翟建国, 黄筱云, 伍炳坤 ..... (101)
- 圆柱形植物斑块水动力特性的大涡模拟研究  
李晗孜, 毛劲乔, 龚轶青, 赵汗青, 戴杰 ..... (108)
- 长江口枯季盐度锋对深水航道及横沙东滩圈围工程的响应特征  
武云龙, 陈括, 匡翠萍, 王洁 ..... (115)
- 基于人工神经网络对侧堰流量系数的预测研究  
沈桂莹, 李国栋, 李珊珊 ..... (125)
- 超深井压裂对管内瞬态波动压力的影响研究  
张智, 王嘉伟, 张华礼, 李玉飞, 张林, 罗伟, 桑鹏飞 ..... (132)

## 学术活动及其他

- Journal of Hydrodynamics 2021 年第 6 期目次 ..... (143)
- 2021 年中文分类总目录 ..... (145)
- 第三十三届全国水动力学研讨会征文通知 ..... (151)
- Scopus 数据库简介 ..... (152)

## CONTENTS

|                                                                                                                                                                  |       |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| Numerical analysis on clearance flow loss of shaftless pump-jet thruster under different conditions                                                              |       |
| Cheng-zao Han, Hua Ruan, Fang-wen Hong, Bin Ji .....                                                                                                             | (1)   |
| Numerical simulation of suppressing vortex-induced vibration of long flexible riser with fairing                                                                 |       |
| Hong-yu Xiao, Fu-rong Li, Ming-bo Sun, Lei Sun .....                                                                                                             | (10)  |
| Research of forces on rudder of integrated waterjet steering and reversing gear based on CFD technology                                                          |       |
| Jun Wang, Gui-bin Li, Yan Zhang, Xue-qin Liu .....                                                                                                               | (21)  |
| Pressure transient analysis of non-uniform multifractured horizontal wells                                                                                       |       |
| Fan-song Meng, Hong-jun Yin, Hong-fei Yuan, Jing Fu, Li Dai .....                                                                                                | (28)  |
| Direct numerical simulation of low Reynolds number 60 degrees intersecting double cylinder                                                                       |       |
| Qin Zhang, Jie Wang, Bing-chen Liang, Qing-qing Yang, Ye-ting Tang .....                                                                                         | (35)  |
| Mechanism of energy balance in a channel flow partially covered by artificial vegetation                                                                         |       |
| Jiao Zhang, Wen Wang, Hu-nan Qiu, Zhan-bin Li .....                                                                                                              | (42)  |
| Investigation on flow field and separation characteristics of oil-water two-phase flow in cylindrical cyclone                                                    |       |
| Mo Zhu, Yu-jun Ou, Chen Wu, Qi-lin Wu, Jian Zhang, Jing-yu Xu .....                                                                                              | (49)  |
| Numerical and experimental investigations on hydraulic performance and cavitation characteristics of aviation liquid-cooled pump using different media condition |       |
| Zhi Li, De-sheng Zhang, Rui-jie Zhao, Fei Wang .....                                                                                                             | (56)  |
| Effect of opposing current on shape of rogue waves in irregular waves by experimental study                                                                      |       |
| Wei-da Xia, Guo-hai Dong, Yu-xiang Ma, Zhuo Chen .....                                                                                                           | (66)  |
| Hydraulic characteristics of a new symmetrical baffle-drop shaft                                                                                                 |       |
| Jun Chen, Ying-xiang Lu, Hong-wu Tang, Jing Yan .....                                                                                                            | (73)  |
| Study on statistical characteristic parameters of normal, oblique incident and multidirectional irregular waves on slope                                         |       |
| Jia-yi Xu, Shu-xue Liu, Jin-xuan Li, Wei Jia .....                                                                                                               | (84)  |
| Influence of C groove parameters on NACA0009 hydrofoil clearance flow                                                                                            |       |
| Guang-kuan Wu, Hao-yang Wang, Xing-qi Luo, Jian-jun Feng, Si-na Yan .....                                                                                        | (93)  |
| Numerical investigation of bubble curtain for mitigating salt intrusion through sea locks                                                                        |       |
| Cong-cong Chang, Jian-guo Zhai, Xiao-yun Huang, Bing-kun Wu .....                                                                                                | (101) |
| Numerical investigation of hydrodynamic properties of cylindrical vegetation patch using large-eddy simulation                                                   |       |
| Han-mei Li, Jing-qiao Mao, Yi-qing Gong, Han-qing Zhao, Jie Dai .....                                                                                            | (108) |
| Response characteristic of salinity front to Deep-Water Channel and Hengsha East Shoal siltation project in dry season of the Yangtze River Estuary              |       |
| Yun-long Wu, Kuo Chen, Cui-ping Kuang, Jie Wang .....                                                                                                            | (115) |
| Prediction of side weir discharge coefficient based on artificial neural network                                                                                 |       |
| Gui-ying Shen, Guo-dong Li, Shan-shan Li .....                                                                                                                   | (125) |
| Effect of fracturing on transient pressure fluctuation of tubing in ultra-deep well                                                                              |       |
| Zhi Zhang, Jia-wei Wang, Hua-li Zhang, Yu-fei Li, Lin Zhang, Wei Luo, Peng-fei Sang .....                                                                        | (132) |
