## Overview

### New Support Structure and Construction Technology of Excavation Engineering

Ying Huiqing 1

## Basement and Foundation

### Construction Practice of Subway Shielding Protection in Super-deep Foundation

Excavation Construction Shao Kaiping, Liu Xiang, Yu Hong, et al 6

### Application of Prestressed Fish-bellied Steel Truss in Deep Foundation Excavation

Supports Sun Qifeng, Liang Qun, Hua Kun 9

### Construction Technology for a Deep Foundation Excavation Under Complicated Conditions

Zheng Ziguang, Li Lin, Cao Hong, et al 12

### Application of Manual Excavation and Drilling by Blasting Technology for Pile with Bearing Base Construction in Some Project

Yang Qi'an, Jiang Ying 15

### The Design and Application of Anchoring Parts in Cement-soil Churning Pile for Recyclable Steel Strands

Liu Quanlin 18

### Application of Pressed Pile Without Anchor Rod in Some Foundation Reinforcement Engineering

Zheng Yuxin 24

### Construction Technology of Rectangular Piles by Rotary Drilling Rig

Chen Yitian, Hu Feng, Li Xiaoliang, et al 27

### Application of Domestic Cold-formed Steel Sheet Piles in Cofferdam Construction in Yangtze River

Gu Mingru 30

### Construction Technology of Large-diameter Circular Steel Sheet Pile Cofferdam

Li Renmin, Liu Wei, Chen Xiaofeng 33

### Stress Analysis of Grouting Pile and Non-grouting Bored Pile in Soft Soil

Gao Huyan, Wu Ming, Huang Qiangbing 38

### Optimization Research for Tall Building Raft Foundation on Rock Foundation

Yang Shujuan, Zang Qifeng, Zhang Tongbo, et al 43

### Discussion on Bearing Capacity Evaluation Method of Spread Foundation of Existing Bridge

Tao Cheng, Yang Yu 45

### Research and Application of Comprehensive Drilling Technology in High Pressure Jetting Diaphragm Wall Construction

Zhao Yi, Jiang Daoyuan 48

### The Test Study of Salty Soil Foundation Treatment with Chemical Modified Method

Yin Bocheng, Gu Qiangkang, Xu Sangzhen, et al 52

## Test and Analysis of Damping Effect of Isolation Trench and Vibration of Dynamic Compaction in Some Project

Li Baohua, An Ming

56

## Application of Double Vibration Reduction Trench in Reducing Dynamic Compaction Vibration Influence

Guo Hong, An Ming

59

## Application of Reinforced Retaining Wall in Airport High Fill Construction

Li Yanwei, Zhao Zhiqiang

61

## Analysis of Cut Slope Stability Under the Influence of Blasting

Chen Ningning, Gao Wenzhe, Zhou Shisheng, et al

64

## Design of Earth-bag Revetment Structure in Riverway

Cheng Longfei, He Yunxiang

68

## Tunnel Engineering

### Study on Casting Test of Immersed Tunnel Segment in Hong Kong-Zhuhai-Macao Bridge

Su Quanke, Luo Yao, Yuan Yong

71

### Comparison and Optimization of Excavation Method for Shallow Large-section Tunnel in Chongqing Wulukou Subway Station

Li Wen, Wang Guoxi

76

### Non-articulation Shield Construction Technology in Small Radius Curve Tunnel

Ji Peng

79

### Application of Integrated Receiving Device in Shield Arriving Construction

Wei Linchun, Zheng Yifeng, Gu Chenying, et al

82

### Research on Super-diameter Slurry Shield Crossing Existing Pile Foundation with Small Distance

Qiu Yuhua, Gu Chenying, Wei Linchun, et al

85

### Research on Layout Design and Deviation Correction of the General Segment in Shield Tunnels

Zhang Wencui, Mu Shixu, Li Jiatao, et al

89

### Analysis on Influencing Factors of the Expressway Tunnel Secondary Lining Support Time

Fang Xiaorui, Sun Yang, Guo Gang, et al

93

### 3D Numerical Simulation of Dynamic Response About Surrounding Rock Displacement During Construction Process in Soft Rock Tunnel

Huang Feng, Zhu Hehua

98

## Project Management

### Application Research on CBR-RBR Hybrid Pattern for the Metro Construction Safety Accident Base

Yu Hongliang, Wu Xianguo, Liu Bo

102

### A Study on Relationship of Engineering Parameters and Safety Risk on Metro Construction

Gong Peisong, Ju Qianqian
