Water Science and Engineering

Vol. 11 No. 1

January 2018

Executive Editor
Yan Lei

Language Editor
Alexander Baron

■ Water Resources

- 1 Understanding groundwater table using a statistical model
Shao-feng Yan, Shuang-en Yu, Yu-bai Wu, De-feng Pan, Jia-gen Dong

■ Aquatic Environment

- 8 Application of a water quality model for determining instream aeration station location and operational rules: A case study
Charles S. Melching
- 17 Influence of pH on short-cut denitrifying phosphorus removal
Wei Li, Hui-yan Zhang, Hui-zhi Sun, Fei Zeng, Yu-nan Gao, Lei Zhu
- 23 Numerical investigation of pollution transport and environmental improvement measures in a tidal bay based on a Lagrangian particle-tracking model
En-jin Zhao, Lin Mu, Ke Qu, Bing Shi, Xing-yue Ren, Chang-bo Jiang
- 39 Effects of elevated atmospheric CO₂ and nitrogen fertilization on nitrogen cycling in experimental riparian wetlands
Jun Liu, Gloria Appiah-Sefah, Theresa Oteng Apreku

■ Water Engineering

- 46 A simplified physically-based breach model for a high concrete-faced rockfill dam: A case study
Qi-ming Zhong, Sheng-shui Chen, Zhao Deng
- 53 Effect of trapezoidal collars as a scour countermeasure around wing-wall abutments
Payam Khosravinia, Amir Malekpour, Ali Hosseinzadehdalir, Davod Farsadizadeh
- 61 Cloud-Verhulst hybrid prediction model for dam deformation under uncertain conditions
Jin-ping He, Zhen-xiang Jiang, Cheng Zhao, Zheng-quan Peng, Yu-qun Shi
- 68 Study of total variation diminishing (TVD) slope limiters in dam-break flow simulation
Feng-peng Bai, Zhong-hua Yang, Wu-gang Zhou
- 75 Experimental and numerical analysis of flow over a rectangular full-width sharp-crested weir
Ghorban Mahtabi, Hadi Arvanaghi
- 81 A quantitative model for danger degree evaluation of staged operation of earth dam reservoir in flood season and its application
Chong-xun Mo, Gui-yan Mo, Qing Yang, Yu-li Ruan, Qing-ling Jiang, Ju-liang Jin
- I Thank you to our peer reviewers
- III Guide for Authors
