

# TECHNICAL SUPERVISION IN WATER RESOURCES

Vol. 18 No. 5 2010 Cumulative No. 97 Bimonthly Publicly Issued

## MAIN CONTENTS

### ❖ Standardization

Discussion on technical standard system for water dredging works ..... *Jin Xuhao Cao Shumin et al.* (1)

Directing the establishment of standardization of water resource industry with the scientific outlook on development

— — — A reflection on the study of view of scientific development ..... *Jin Ling Wu Jian* (5)

The drawbacks of estimated unit price for labour in the quota for water works and measures for their improvement ..... *Wang Shuzhen* (8)

### ❖ Measurement

Safety control of water environmental monitoring laboratories of water quality testing organization ..... *Han Jing* (10)

Cause analysis of the total nitrogen exceeding the standard in the Tingxian reservoir, Ningpo ..... *Zhao Yangyong Ma Jingjun et al.* (13)

### ❖ Quality

Application of PDCA circulation in scientific research work ..... *Li Fei* (16)

“Three controls” for supervision work in the safety program of potable water engineering work in countryside

..... *Wang Jianjiang* (20)

### ❖ Water Resources

Discussion on realization of unified governance of water resources in the Kashgar River basin ..... *Adalaiti • Tuldij* (24)

Directing the construction and management of Donggang irrigation area with the scientific outlook on development ..... *Guan Yinghong Liu Kaikun* (27)

Discussion on multipurpose treatment of soil and water conservation of the area at the Hongtoushan in Jin Gouhe basin, Xinjiang ..... *Kong Linglai Lei Zhenglong* (30)

Brief analysis of the benefits of the Panxian storage project in the extreme drought ..... *Li Ruzhen Hu Shaoqiong* (32)

### ❖ Informationization

Research on and implementation of automatic drafting system for galleries in Tingzikou dam ..... *Zeng Linghua Yang Xinjun* (34)

Discussion on electronic documentation and electronic archives ..... *Zhou Ling* (37)

Network-based remote control system for small reservoirs ..... *Li Shengcheng* (40)

### ❖ Theory Study

Study and implementation of seepage control scheme for consolidation and reinforcement of long and low dams ..... *Li Xijun He Runqiu* (43)

Study and test of maintaining air content of concrete to improve durability of concrete in the Laxiwa hydroelectric project ..... *Qu Li* (47)

Design of reinforcement work for the embankment dams ..... *Dang Xuemei* (50)

Research on improvement and utilization of saline and alkali land in Fuhai irrigation area ..... *Lu Jun Zou Dehua* (54)

### ❖ Engineering Practice

Estimation of gust water in the water carrying system at intersection zone of the Liuhe fault of the Dahuofang reservoir ..... *Wang Baiqiang Kou Cheng et al.* (56)

The extension plan of the main dam and the comparison of dam types of auxiliary dam of Ejing reservoir, Shenzhen Municipal ..... *Li Wenzhen Zhang Chuanlei* (59)

Stability analysis of flood outlet structures for a certain reservoir ..... *Zhu Chunji* (63)

Construction technologies for excavation and blasting of plugs left at the intakes of the double curvature high dam of the Xiaowan hydroelectric project ..... *Zhong Changxue* (65)

Design and construction of the main works of the Nanyuanhe-II hydroelectric project ..... *Chen Nengxiang* (68)

Editor: Editorial Department of Technical Supervision in Water Resources, Water Resources and Hydropower Planning and Design General Institute, MWR, China

Editor in Chief: Li Weitao

Publisher: China Water Resources & Hydropower Press

Distributor: Science & Technology Division of WHPDGI, MWR, China

Address: Liupukang, Beijing 100120, China

Tel: (8610)62033377-7053,7082

Fax: (8610)62056492
