标准化与质量监督

检验检测

辽河干流滩地泥沙运移机制试验分析 胡庆武(11) 豆坪河纸槽沟堰塞湖应急监测及风险评估 强宏伟 吕亚斌(15) 泵站变频机组性能现场测试分析 涂小强(21) 平面事故闸门动水闭门故障分析及体型优化实验研究 杨 波(23) 无压输水隧洞出口连接井水力流态试验研究 张栋梁(28)

信息化

 长距离压力输水工程水锤态势应急监测系统设计
 胡 伟(32)

 辽宁省水文站网综合智能管理系统研发与应用
 刘 丹(37)

 BIM 技术在水利工程施工中的应用
 陈文亮 王 良 等(43)

 高分数据在大型灌区改造规划中的应用
 王一鑫(45)

 水下岩塞高精度空间地理信息获取方法与应用
 赵亚峰(48)

 水利枢纽泵站自动化控制系统设计
 相 楠(52)

 无人机倾斜模型在水库极端洪水演进中的应用
 王庆平 王轶凡(56)

 基于 BIM 技术的输水工程土石方量测算及出图方法研究
 李梦龙(59)

 BIM 技术在渡槽设计中的应用
 陈献友 李芬花 等(63)

建设与管理

征地移民实物调查前发布的停建令引发的可得利益问题探讨 ……… 杨随柱(80)

大中型水库移民后期扶持项目实施的现状与规划 ··········· 王淑伟(83) 铁路工程单价承包模式下工程量清单编制探讨 ······ 韦妙鸳 金佳鸣(86)

取水泵站的运行与调度管理分析 ……… 叶邓豪(91)

洞庭湖区堤防工程精细化管理模式及应用 ………… 刘 贝(93)

辽宁水文现代化建设与发展 …… 宋雪迪(97)

CONTENTS

• Standardization and Quality Supervision

| Discussion on the work of environmental protection design representative of water resources project |
|---|
| |
| Thoughts on safety management of legal person in major water resources projects |
| Analysis of and measures for quality guarantee growth rate of water resources project construction |
| |
| Enlightenment of dam break events at home and abroad on dam safety management |
| Inspection and Testing |
| Experimental analysis of sediment transport mechanism in the main stream of Liaohe river |
| Emergency monitoring and risk assessment of Zhicaogou dammed lake in Douping river |
| Field test analysis of variable frequency unit performance in pumping station |
| Failure analysis of hydrodynamic closing of plane emergency gate and experimental study on its body shape optimization |
| |
| Experimental study and result analysis on hydraulic flow pattern of connecting well at outlet of non pressure water conveyance tunnel |
| ZHANG Dongliang(28) |
| ● Informazation |
| Design of emergency monitoring system of water hammer situation for long distance pressure water conveyance project |
| |
| |
| Development and application of integrated intelligent management system of hydrological station network in Liaoning province |
| |
| Application and prospect of BIM technology in water resources project construction CHEN Wenliang WANG Liang et al. (43) |
| Application of high score data in reconstruction planning of large irrigation system |
| High precision spatial geographic information acquisition method and application of underwater rock plug ZHAO Yafeng(48) |
| Design of automatic control system for pumping station of water resources project |
| Application of UAV tilt model in reservoir extreme flood routing |
| Research on calculation and mapping method of earthwork volume of water conveyance project based on BIM technology |
| LI Menglong(59) |
| Application of BIM technology in aqueduct design |
| Construction and Management |
| Investigation and countermeasures of groundwater status in Laizhou city |
| Research on the whole process quality inspection cost of project legal person in Xinjiang water resources project budget |
| |
| Study on optimal operation of mountain reservoir and plain reservoir |
| Discussion on the available benefits caused by the suspension order of water resources and hydropower engineering construction |
| projects |
| The current situation and planning of the later stage support project implementation for large and medium sized reservoir |
| resettlement WANG Shuwei(83) |
| Discussion on the compilation of quantities bill under the unit price contract mode of railway engineering |
| |
| Analysis of operation and dispatching management of water intake pumping station |
| Fine management mode and its application in dike engineering in Dongting Lake area LIU Bei(93) |
| Modernization construction and development of hydrology in Liaoning province |
| Application of cost benefit evaluation model in comprehensive calculation of small reservoirs degradation and abandonment |
| |
| Three Rongining (100) |

CONTENTS

• Theory Study

| Analysis and calculation of hydraulic common concrete batching list Li Hongjun LONG Wenfei et al. (105) |
|---|
| Engineering design index and comprehensive analysis of modern ecological irrigation system GUO Jihua (108) |
| Discussion on influencing factors of early damage of asphalt pavement of flood control road of the Yellow River embankment ······ |
| |
| Research on design optimization analysis of pre-stressed anchor cable tension parameters of pier WANG Anshun(114) |
| Simulation calculation study on safety design scheme of anchorage structure of reservoir sluice pier SHI Jing(118) |
| Influence of summer temperature on runoff of Bayingouheriver in Tianshan Mountains |
| |
| Comparative study on prediction models of rock-fill settlement during completion period of high core rock-fill dam FU Yong(127) |
| Spatiotemporal changes and nutritional status of phytoplankton community structure in Jinshanhulake |
| ZHANG Leyuan ZHANG Zhen et al. (131) |
| Adsorption experiment of aquatic plant microbial community in Liaohe river basin based on high throughput sequencing method |
| ZHANG Lei(135) |
| Distributed flood inundation model based on rainfall-runoff integrated process |
| Study on groundwater environmental quality assessment based on different assessment methods XU Chuankun ZHAI Yanan(144) |
| Numerical simulation study of hydraulic fracturing based on extended finite element method HUANG Xudong TIAN Yuan (149) |
| Research and practice of ecological management technology in Liaohe river beach area |
| Comparative optimization study of different bottom edge types of radial steel gate under operation conditions GAI Haorui (159) |
| Identification of pollution factors and analysis of pollution sources of shallow groundwater in western Liaoning province |
| |
| Cause analysis and treatment scheme of reservoir bank landslide |
| Analysis of small and medium sized river regulation problem based on system engineering theory YI Kangmei SUN Yuemin(171) |
| • Engineering Practice |
| Causes and solutions of winter freezing water supply pipe in rural areas of Gansu province ZHANG Chonghua(175) |
| Application of 3D reinforcement in water resources projects FENG Qinggang(179) |
| Research and application of high performance concrete in Kalabele project |
| Study on the influence of sediment storage in Toutunhe reservoir based on a new typed sand separation device LI Hongjin(189) |
| Analysis of ecological control measures of water environment in Heishuiheriver SHANG Zhenyu (195) |
| Influence of backfill concrete on the back of theintake toweron seismic performance of tower structure LI Wei(199) |
| Soil and water conservation design of Shenzhen Pumped Storage Power Station DUAN Dongliang ZHANG Xiaoyuan et al. (206) |
| Research on the selection of collecting line diameter of wind farm |
| Application of the combination of compacted block stone and coarse sand gravel tamping in the treatment of liquefiedriverfoundation |
| |
| Study on foundation pit dewatering and cofferdam seepage control scheme of drainage pumping station construction project |
| |
| Research on pipe jacking construction technology of Changjiang river flood control embankment in Jingdezhen city |
| |
| Study on system risk assessment technology of Danshan sluice water stop project |
| Design of high pressure direct distribution power supply scheme of pumping station for long distance water supply project |
| in mountainous area |
| Study and application of active coupler throwing experiment |
| Comparison and analysis of flood discharge structure schemes with zero impact reconstruction |
| COMPANSON and analysis of nood discharge structure schemes with zero impact reconstruction |

落实安全责任推动安全发展

增强全民安全意识提升公众安全素质
