## 目 次

### 塑性成形技术与工艺

|                                        |                        |
|----------------------------------------|------------------------|
| 基于 BPNN 神经网络的板材 V 型折弯回弹预测模型 .....      | 管志平, 李金钊, 韦钦洋, 等 (1)   |
| AA5052 铝合金板渐进成形表面质量与工艺改进方法 .....       | 徐泽沛, 常志东, 吴仁豪, 等 (11)  |
| 异形薄壁不锈钢隔热罩冲压成形数值分析 .....               | 王树飞, 陈岁繁, 何雄华, 等 (19)  |
| 基于薄壁管材冷弯工艺的空心芯棒形状参数研究 .....            | 白璐, 刘俊, 王子昂 (28)       |
| 高温合金矩形波纹管液压胀形变形特征 .....                | 吕志勇, 刘静, 李兰云, 等 (36)   |
| 大锻件用 25Cr2Ni4MoV 钢镦粗与拔长工艺分析 .....      | 方旭升, 汪盼盼, 奚涛涛, 等 (47)  |
| 镁合金反复镦挤变形的有限元分析和实验研究 .....             | 范宇田, 卢立伟, 刘剑波, 等 (56)  |
| 挤压温度对铝合金内螺纹管齿形的影响 .....                | 熊振, 黄东男, 李旭东, 等 (66)   |
| 316H 钢锻后固溶处理混晶缺陷产生原因与控制策略 .....        | 李佳航, 李杨齐, 董凯, 等 (76)   |
| Ti6554 钛合金双道次热挤压宏微观演化的有限元模拟与试验研究 ..... | 刘斌, 武川, 周宇杰 (83)       |
| 微沟槽多道次滚压工艺参数分析及优化 .....                | 王回航, 高绪杰, 朱光明, 等 (96)  |
| 双机架湿平整软料轧制过程工艺润滑优化技术 .....             | 令狐克志, 崔熙颖, 胡万通 (105)   |
| TiB95 合金管材斜轧穿孔工艺的有限元模拟 .....           | 张一帆, 宋德军, 张智超, 等 (110) |
| 3D 打印大尺寸 CF/PC 复合材料框架式模具温度分布 .....     | 石文超, 方伟, 崔北顺, 等 (117)  |
| 基于电塑性效应的钨合金铣削试验研究 .....                | 姜颢天, 靳刚, 秦娜, 等 (123)   |

### 材料性能与变形理论

|                              |                       |
|------------------------------|-----------------------|
| 金属波纹管旋压-辊压联合成形过程变形行为分析 ..... | 许石民, 燕猛, 王孟业, 等 (131) |
|------------------------------|-----------------------|

|                                       |                        |
|---------------------------------------|------------------------|
| 基于 BP 神经网络的 DP980 钢板本构关系 .....        | 林启权, 卜 根, 王镇柱, 等 (139) |
| 基于麻雀搜索算法优化双隐含层 BP 神经网络的张力减径钢管壁厚预测 ... | 胡建华, 黄宇龙, 张 坚, 等 (145) |
| 基于 BP 神经网络的金属薄板包辛格效应预测 .....          | 苟建军, 王 森, 王 健, 等 (152) |
| 钛合金电辅助拉伸变形的三场耦合建模与试验研究 .....          | 周宇杰, 曲周德, 武 川, 等 (158) |
| 高应变速率下 AA6014 铝合金的力学性能 .....          | 金飞翔, 王康文, 秦 强, 等 (168) |
| 电池壳钢韧性断裂与成形极限研究 .....                 | 张久昌, 顾 楠, 杨华超, 等 (173) |
| 内凹工字形蜂窝结构的面内冲击性能 .....                | 王腾博, 秦东晨, 王婷婷, 等 (183) |
| Ti60 近 $\alpha$ 钛合金的热变形行为和组织演化 .....  | 尹宝琴, 徐 帅, 肖纳敏, 等 (193) |
| 常化温度对高牌号无取向硅钢热轧板组织及冲击韧性的影响 .....      | 钱红伟, 张 杰, 秦 松, 等 (203) |
| 基于生产大数据的薄带钢平整机轧制力设定计算模型 .....         | 王晓东 (209)              |
| 弯管中性层偏移计算及截面畸变分析 .....                | 陈文佳 (222)              |
| X80 管道焊缝凹陷应力应变特征数值计算分析 .....          | 李成兵, 熊小钦, 张 昕, 等 (230) |

## 消息

|                                           |       |
|-------------------------------------------|-------|
| “第十七届全国塑性工程学术年会暨第九届全球华人塑性技术研讨会”隆重召开 ..... | (65)  |
| 欢迎订阅《塑性工程学报》杂志 .....                      | (144) |

## Contents

### Plasticity Forming Technology and Process

|                                                                                                                      |                                                         |
|----------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------|
| Prediction model of V-shaped bending springback of sheet metal based on BPNN neural network                          | GUAN Zhi-ping, LI Jin-zhao, WEI Qin-yang, et al ( 1 )   |
| Process improvement method for surface quality of 5052 aluminum alloy sheet during incremental sheet forming         | XU Ze-pei, CHANG Zhi-dong, WU Ren-hao, et al ( 11 )     |
| Numerical analysis of stamping forming for special-shaped thin-walled stainless steel heat shield                    | WANG Shu-fei, CHEN Sui-fan, HE Xiong-hua, et al ( 19 )  |
| Research on shape parameters of hollow mandrel based on cold bending process of thin-walled tubes                    | BAI Lu, LIU Jun, WANG Zi-ang ( 28 )                     |
| Deformation characteristics of hydroforming of superalloy rectangular bellows                                        | LÜ Zhi-yong, LIU Jing, LI Lan-yun, et al ( 36 )         |
| Analysis on upsetting and stretching process of 25Cr2Ni4MoV steel for heavy forgings                                 | FANG Xu-sheng, WANG Pan-pan, XI Tao-tao, et al ( 47 )   |
| Finite element analysis and experimental study on repeated upsetting and extrusion deformation of magnesium alloy    | FAN Yu-tian, LU Li-wei, LIU Jian-bo, et al ( 56 )       |
| Influence of extrusion temperature on tooth profile of aluminum alloy internal thread pipe                           | XIONG Zhen, HUANG Dong-nan, LI Xu-dong, et al ( 66 )    |
| Investigation and control strategy of mixed-grain defects in 316H steel during solution treatment after forging      | LI Jia-hang, LI Yang-qi, DONG Kai, et al ( 76 )         |
| Finite element simulation and test study on macro-micro evolution of Ti6554 titanium alloy by two-pass hot extrusion | LIU Bin, WU Chuan, ZHOU Yu Jie ( 83 )                   |
| Analysis and optimization of micro-groove multi-pass rolling process parameters                                      | WANG Hui-hang, GAO Xu-jie, ZHU Guang-ming, et al ( 96 ) |
| Optimization technology of process lubrication system in soft material rolling process of double stand wet temper    | LINGHU Ke-zhi, CUI Xi-ying, HU Wan-tong ( 105 )         |

|                                                                                   |                                                              |
|-----------------------------------------------------------------------------------|--------------------------------------------------------------|
| Finite element simulation of cross rolling piercing process of TiB95 alloy tube   | ..... ZHANG Yi-fan, SONG De-jun, ZHANG Zhi-chao, et al (110) |
| Temperature distribution of large size CF/PC composite frame mold for 3D-printing | ..... SHI Wen-chao, FANG Wei, CUI Bei-shun, et al (117)      |
| Test study on tungsten alloy milling based on electroplasticity effect            | ..... JIANG Hao-tian, JIN Gang, QIN Na, et al (123)          |

Material Performance and Deformation Theory

|                                                                                                                                                          |                                                                |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------|
| Deformation behavior analysis of metal bellows in spinning-rolling combined forming process                                                              | ..... XU Shi-min, YAN Meng, WANG Meng-ye, et al (131)          |
| Constitutive relationship of DP980 steel sheet based on BP neural network                                                                                | ..... LIN Qi-quan, BU Gen, WANG Zhen-zhu, et al (139)          |
| Wall thickness prediction of steel pipe during tension reduction based on double hidden layer BP neural network<br>optimized by sparrow search algorithm | ..... HU Jian-hua, HUANG Yu-long, ZHANG Jian, et al (145)      |
| Prediction of Bauschinger effect for metal thin sheet based on BP neural network                                                                         | ..... GOU Jian-jun, WANG Sen, WANG Jian, et al (152)           |
| Three-field coupled modeling and test study of electrically assisted tensile deformation of titanium alloys                                              | ..... ZHOU Yu-jie, QU Zhou-de, WU Chuan, et al (158)           |
| Mechanical properties of AA6014 aluminum alloy with high strain rate                                                                                     | ..... JIN Fei-xiang, WANG Kang-wen, QIN Qiang, et al (168)     |
| Study on ductile fracture and forming limit of battery case steel                                                                                        | ..... ZHANG Jiu-chang, GU Nan, YANG Hua-chao, et al (173)      |
| In-plane impact performance of concave I-shaped honeycomb structure                                                                                      | ..... WANG Teng-bo, QIN Dong-chen, WANG Ting-ting, et al (183) |
| Thermal deformation behavior and microstructure evolution of near $\alpha$ Ti60 titanium alloy                                                           | ..... YIN Bao-qin, XU Shuai, XIAO Na-min, et al (193)          |
| Effect of normalizing temperature on microstructure and impact toughness of high grade non-oriented silicon steel<br>hot-rolled sheet                    | ..... QIAN Hong-wei, ZHANG Jie, QIN Song, et al (203)          |
| Roll force setting calculation models of temper rolling mill for thin strip steel based on big data of production                                        | ..... WANG Xiao-dong (209)                                     |
| Calculation of neutral layer displacement and analysis on section distortion in bending tube                                                             | ..... CHEN Wen-jia (222)                                       |
| Numerical calculation analysis of stress and strain characteristics of weld dent on X80 pipeline                                                         | ..... LI Cheng-bing, XIONG Xiao-qin, ZHANG Xin, et al (230)    |
