## 目 次

### 储运技术

- 1 储罐桩基基础环墙的计算及配筋 ..... 常广勋 刘建平 李鹏 杨蕊 李韫慧

### 油气管道

- 5 俄罗斯高寒冻土区新建管道投产的技术标准体系 ..... 刘福建 陶金姜旭 李雪坡 武思雨 马伟平

### 安全技术

- 9 系统理论事故模型和流程分析法(STAMP)在石油库安全管理中的应用 ..... 禹治宇

### 信息技术

- 13 互联网下智能客服系统的建设与实践 ..... 陈刚

### 环境保护

- 19 光伏发电技术在加油站的应用 ..... 程琪

- 24 含油污泥的处理方法 ..... 起泽华

### 数质量管理

- 27 油库发油系统温度补偿技术的探讨 ..... 刘则

- 30 压缩比法与风量调节法测定柴油十六烷值的对比 ..... 吴振中 万玲玲

- 33 气相色谱同时测定汽油中氧和苯含量技术的探索 ..... 马芝玉

### 安全管理

- 37 加油站施工用电的管理 ..... 王友良

- 39 对加油站系统安全风险管理的思考 ..... 陈影

### 经营管理

- 42 加油站租赁合同存在的法律风险及防控 ..... 陈大伟

## Contents and Abstracts

### STORAGE TECHNOLOGY

1 Calculation and Reinforcement of the Ringwall of Pile Foundation of Storage Tank. Chang Guangxun, Liu Jianping, Li Peng, Yang Rui, Li Yunhui.

**Abstract:** Based on the stress situation of the ringwall of pile foundation of storage tank, it was proposed that the ringwall of pile foundation of storage tank can be calculated according to the national standard "Code for design of steel tank foundation (GB 50473 - 2008)"; the ringwall height containing or not containing raft thickness can be determined depending on the ratio of ringwall thickness to raft thickness; the effect of ringwall height on circumferential force design value is compared. The suggestions on vertical reinforcement of ringwall are put forward according to construction experience.

**Key words:** oil depot, storage tank, pile foundation, ringwall, calculation, reinforcement.

### OIL AND GAS PIPELINE

5 Research on Technical Standard System for New Pipeline Commissioning in Russia. Liu Fujan, Tao Jin, Jiang Xu, Li Xuepo, Wu siyu, Ma Weiping

**Abstract:** According to the relevant standards, advanced experience and mature practices of Russia on oil pipeline construction in frozen area and operation management, taking the commissioning of pipeline as an example, the advanced concept of Russian standards in the aspects of pipeline pigging, pressure test, commissioning handover and operation monitoring is introduced, which is embodied in the following aspects, viz. the application of gel pipeline pig to ensure new pipeline cleaning quality; the test technology of pipeline in frozen area, including high strength pressure test, zero pressure test technology, repeated pressure test for delay production; the pipeline operation conditions; the test of key equipment during pipeline commissioning; and the operation management requirements of delayed pipeline commissioning. The research results have guiding significance for the safe operation of Sino - Russian oil and gas pipeline.

**Key words:** Russia, oil pipeline, production, standard, experience, practice, introduction.

## SAFETY TECHNOLOGY

9 Application of Systems – Theoretic Accident Model and Processes (STAMP) Analysis Method in Safety Management of Oil Depot. Yu Zhiyu.

**Abstract:** The concept of Systems – Theoretic Accident Model and Processes (STAMP) is introduced, the difference with the traditional commonly – used safety analysis methods, such as fault tree analysis method is pointed out, and it is compared conceptually with the traditional safety analysis methods from the aspects of the relationship of formation and cause of accident, accident cause identification, risk probability, and formulation of risk information. Using the method, the safety of oil depot was evaluated and analyzed in the prophase of construction, construction stage and operation stage, providing a new safety analysis method to enhance the safety management of oil depot.

**Key words:** oil depot, safety, management, systems – theoretic accident model and process (STAMP) analysis method, application.

## INFORMATION TECHNOLOGY

13 Construction and Practice of Intelligent Customer Service Center under Internet. Chen Gang.

**Abstract:** For the problems existing in the customer service center of traditional oil sales enterprise, such as simple service mode, low work efficiency, uneven service quality and high labor costs, and the situation that the service quality could not keep up with the business development, combining with the Internet application, the functional customer service platform was established by introducing knowledge base and intelligent robot technology. The phased result is achieved, which showed that the service level and work efficiency was improved with the operation cost reduced. The platform could provide support to improve the reputation and core competitiveness of oil sales enterprise.

**Key words:** oil sales enterprise, internet, intelligent customer service center, construction, application.

## ENVIRONMENTAL PROTECTION

19 Research on Application Effect of Photovoltaic Power Generation Technology in Gas Station. Cheng Qi.

**Abstract:** On the basis of introducing the principle of photovoltaic power generation and photovoltaic power generation system, taking the pilot project of photovoltaic power generation system in 2 gas stations in Hainan as an example, a feasible scheme of photovoltaic power generation system implemented at gas station is put forward, and the investment and profit of photovoltaic power generation system at gas sta-

tions are analyzed. The results show that the investment payback period of photovoltaic power generation system at gas stations is moderate, which can reduce the power consumption of gas stations with high social and economic benefits, and play a promoting role in energy saving, emission reduction and consumption reduction.

**Key words:** photovoltaic power generation, principle, gas station, application, benefit, analysis.

24 Discussion on Treatment Method of Oily Sludge. Qi Zehua

**Abstract:** On the basis of introducing the definition, source and main harm of oily sludge, several common methods for treating oil sludge, such as landfill method, incineration method, solidification and chemical stabilization treatment, mechanical separation, high temperature treatment and solvent extraction, were introduced. The main methods for the comprehensive utilization and treatment of sludge and relevant suggestions were proposed.

**Key words:** petroleum, sludge, treatment, method, introduction.

## QUANTITY AND QUALITY MANAGEMENT

27 Discussion on Temperature Compensation Technology of Oil Delivery System in Oil Depot. Liu Ze.

**Abstract:** At present, most of the metering systems in oil depot are volumetric flowmeter, which is influenced by many factors such as temperature, pressure, standard density and air floatage and so on, but the mass is taken as a settlement method by users. It will produce certain errors in the volume and mass conversion, which easily lead to disputes. Therefore, the improvement measures of delivery systems for vehicle gasoline, diesel and ethanol gasoline are put forward respectively. For vehicle gasoline and diesel delivery system, the first is to use mass flowmeter instead of volumetric flowmeter; the second is to use temperature compensation technology, add the temperature transmitter, put oil standard density data into the quantitative oil delivery system, so as to revise and compensate the oil temperature in real time. For ethanol gasoline, temperature compensator should be installed in two blending pipelines, respectively.

**Key words:** oil depot, vehicle gasoline, vehicle diesel, ethanol gasoline, oil delivery system, temperature compensation.

30 Comparison of Compression Ratio Method and Air Volume Regulation Method for Determining Diesel Cetane Number. Wu Zhenzhong, Wan Lingling.

**Abstract:** The two test methods for determining the cetane number of diesel fuel by compression ratio method and air volume regulation method are compared from the aspects of test principle, accuracy and precision. The results show that both of the test

methods are reliable. Compared with the compression ratio method, the air volume regulation method has the advantages of fast analysis speed and high accuracy.

**Key words:** diesel, cetane number, determination, compression ratio method, air volume regulation method, comparison.

33 Investigation on Simultaneous Determination of Oxygen and Benzene Content in Gasoline by Gas Chromatography. Ma Zhiyu.

**Abstract:** In view of the current situation that 2 gas chromatographs need to be configured to detect the oxygen and benzene content in gasoline, because different filling columns and detectors are used respectively, resulting in low work efficiency and high detection cost, the method by combining a traditional valve switching system and a capillary tube control technique, using a gas chromatograph and a double hydrogen flame ionization detectors (FID) to determine the content of oxygen and benzene in gasoline simultaneously through once sampling is presented. The feasibility of the method is analyzed. This detection method can help to greatly improve the work efficiency and save the detection cost.

**Key words:** vehicle gasoline, oxygen content, benzene content, detection, method, discussion.

## SAFETY MANAGEMENT

37 The Management of Electricity in Construction of Gas Station. Wang Youliang.

**Abstract:** Combining with the practice of construction and transformation of gas station, the problems of non standard temporary distribution box, irregular use of electric wire, poor management of power distribution and lack of electricity knowledge in the process of construction and transformation of gas stations are pointed out, and the countermeasures to strengthen the management of electricity in construction of gas stations are put forward; the first is to draw the circuit diagram for temporary construction, and the second is to strictly execute grounding, utilization of distribution box and switch box, on-site lighting, application and maintenance of distribution

lines and key electrical installations and other related provisions, to ensure the safety of electric power in construction and transformation of gas stations.

**Key words:** gas station, construction, transformation, electricity, safety, management.

39 Thoughts on Safety Risk Management of Gas Station System. Chen Ying.

**Abstract:** The concept of safety risk and risk control, the method and content of safety risk management are introduced briefly, the basic flow of safety risk control of gas station system is described, and measures to strengthen the safety risk management of gas station are put forward; the first is to strengthen the safety analysis and evaluation of gas station system; the second is to strengthen the management and training of front-line staff; the third is to strengthen the management of the operation site of gas station; and the forth is to strengthen the maintenance and replacement of the refueling equipment.

**Key words:** gas station, system, safety, risk, management, thoughts.

## OPERATION MANAGEMENT

42 The Legal Risks in Gas Station Leasing Contracts and Preventive Measures. Chen Dawei.

**Abstract:** Combining the practice of gas station leasing business, the weak legal risk consciousness and the legal risk of lack of related evidence during the contract signing, execution and after contract signing in the process of the gas station leasing are pointed out, and the corresponding prevention and control measures are put forward; the first is to strengthen the legal risk consciousness of contract; the second is to carry out the due diligence and legal opinion review; the third is to track and monitor the performance of the contract; the forth is to deal with the legal disputes in real time; the fifth is to establish a perfect management system for the lease project of gas station to ensure the strict performance of the lease contract and to safeguard the legitimate rights and interests of the two parties.

**Key words:** gas station, leasing, contract, law, risk, prevention, measures.

# LED油站气站防爆灯

## 产品特点 / PRODUCT FEATURES

- 实用新型专利技术产品(专利号:ZL.2014.2.0245850.3,高达145lm/W,显著提升照明效果的同时,大大降低用电。)
- 宽电压设计,供电110~240V,不受输出影响。
- 可带应急功能,应急电池一次充电可使用120分钟以上。无需单独配备应急光源,直接使用照明光源,应急功率可调。

专为加油\气站设计

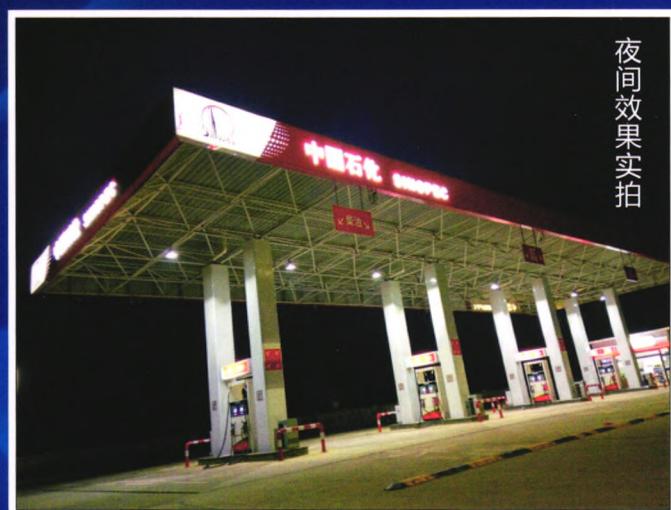

**节能高效**

**安全环保**

# LED智能控制标识灯箱

智能控制品牌柱灯箱,专利技术(实用新型专利号:2015.2.0834743.9)日耗电量最低可达2.2度。

智能控制檐口灯箱,专利技术(实用新型专利号:2015.2.0834748.1)日耗电量最低可达5.4度。

**智能控制  
超低能耗**
