Natural Product Research and Development

QK2117836

The central graphic features a large, light blue hexagonal area. On the left side of this area, there are three analytical method labels: 'NMR' at the top, 'X-ray' in the middle, and 'HPLC' at the bottom. A line graph with several peaks is positioned between these labels. On the right side, four smaller white hexagonal frames are arranged in a cluster, each containing a different natural product illustration: a flower (top), a beetle (middle-left), a starfish (middle-right), and a plant branch with leaves and small flowers (bottom). Dashed lines connect the 'NMR', 'X-ray', and 'HPLC' labels to the four product frames, suggesting the application of these analytical techniques to the study of these natural products.
