Natural Gas Industry, approved by the State Scientific and Technological Commission, is a unique gas journal in China with an overall view on science and technology of gas industry. Starting her first issue in 1981, NGI has a history of nearly 30 years' experience. NGI has turned from bimonthly to monthly journal since the first issue in 2004. NGI has grown up to be one of the exclusively essential journals in China reporting on new theories and techniques related to natural gas industry both at home and abroad, which covers industry spotlights, geologic research, geophysical exploration, drilling engineering, development and production, storage and transportation, gas processing and utilization, QHSE management, marketing and economy, etc. ■
