

Special Steel

Vol. 32, No. 3

June 2011

CONTENTS

• Test and Research •

- Development of Secondary Cooling Water Distribution Model for Large-Size Round Bloom Casting *Zeng Zhi, Han Zhanguang, Li Jing and Zhang Jiaquan(1)*
Math Simulation on Casting and Solidifying Process of 1.9 t Slab Ingot of Cold Working Die Steel D2 and Internal Defect Prediction *Li Ying, Yuan Xiaodong, Zhang Dongwei, Li Shengli, Tao Jun and Ai Xingang(5)*
A Study of Water Modeling on Circulation Flow Rate in RH Vacuum Refining Process *Ou Honglin, Bao Yangping, Yue Feng and Lin Lu(9)*
Physical Modeling of Fluctuation of Liquid Level in Mold of Vertical Slab Concaster *Zhao Zhigang, Hu Kuntai, Chen Yuanqing, Shi Zhe and Qiu Shengtao(12)*
A Study on Flow Field of Liquid in Concasting Mold by Water Model Testing *Zheng Yan, Zhang Liping, Liang Na and He Qingwen(15)*

• Process and Materials Progress •

- Development and Application of Premelted Slag for Electroslag Remelting Process *Jiang Zhouhua, Dong Yanwu, Zhang Xinfu and Yang Fan(17)*
Progress of Research on Performance of Passive Films of Stainless Steels *Gui Yan and Gao Yan(20)*

• Technique and Process •

- Effect of Carburetant in BOF Tapping and RH Refining on Cleanliness of High Carbon Steel SWRH82B *Liu Huijie, Fu Jun, Wang Guojun, He Hongyin, Liu Haitao and Chen Weiqing(25)*
A Study on Transformation of Inclusions of CaO-Al₂O₃-SiO₂-MgO System in Stainless Steel ZG06Cr13Ni4Mo with EAF-LF-VOD-Casting Flow Sheet *Liu Jianhui, Zhu Rong, Li Shiqi and Dong Han(28)*
Calculation and Application of Charging Material and Heat Balance in 150 t Top and Bottom Combined Blown Converter *Lü Ya, Wang Xinzhai, Hu Rui, Liu Lei, Li Wenshan and Lü Gaosen(33)*
A Study on Effect of Casting Speed Fluctuation on Fluctuation of Liquid Level in Mold during Billet Concasting Process *Zuo Xiangjun and Zhang Lifeng(37)*
Application of Carbo-nitride Precipitation Model in Concasting Process of Nb-Bearing Microalloyed Steel for Ship Plate *Zhang Xiaohuan, Liu Ke, Li Yang, Zhang Jiaquan, Liu Xuehua, Zhang Qiaoying and Zhang Jianping(40)*
Development of Drawing Forming Process for Outside-Square Inside-Circular Tube based on Finite Element Simulation *Liu Sheng, Wang Bowen and Lin Xifeng(44)*
Practice of Process for VOD Nitrogen Bottom-Blown Refining High Nitrogen Steel P91 *Guo Chang, Lü Wenjun, Zhou Lixin, Zhang Zhicheng, Yu Yaping and Ke Lin(48)*
Development of Tire Cord Steel XLX72A by 80 t Top and Bottom Combined Blown Converter-LF No1-LF No2-VD-CC Flow Sheet *Wu Shengjun(51)*

• Structure and Properties •

- Precipitating Behavior of Secondary Phases in High Performance Bridge Steel *Wu Baoping, Huang Yunhua, Zhang Yue and Cai Zhen(54)*
Transformation Behavior of Hot Continuous Rolling E36 Ship Plate during Continuous Cooling *Hu Hai, Zhao Gang, Bao Siqian, Ye Chuanlong, Xiong Xiangjiang, Li Lingling and Yang Xiaojun(58)*
Effect of Elevated Temperature Aging on Ambient Tensile Properties of Steel S31042 *Wang Jingzhong, Liu Zhengdong, Cheng Shichang and Bao Hansheng(61)*
A Study on Crevice Corrosion Performance of 445M Ferrite Stainless Steel *Gu Yue, Zhan Zhaolin and Rong Fan(65)*
Effect of Nitrogen on Mechanical Properties of Bearing Steel GCr15 at Elevated Temperature *Yang Jichun and Liu Nan(68)*

Sponsored by Sub-Society for Specialty Steels,
Chinese Society for Metals
