COVER

The cover image presents the schematic diagram of hydrogen production from water electrolysis. On page 869, LING and WANG review several two-dimensional materials, including MoS₂, MXenes and boron monolayer, for electrocatalytic hydrogen evolution reactions, the strategies of performance improvement and the structure — catalytic activity relationship are mainly emphasized, the challenges and prospective for future development of electrocatalysts for hydrogen evolution are also summarized.

Recent Advances in Electrocatalysts for the Hydrogen Evolution Reaction Based on Graphene-Like Two-Dimensional Materials

LING Chong-Yi WANG Jin-Lan

Acta Phys. -Chim. Sin. 2017, 33 (5), 869–885

We highlight research efforts towards developing electrocatalysts for the hydrogen evolution reaction in this review based on 2D materials including transition metal disulfides, MXenes, and boron monolayers, and we summarize the challenges and perspectives for the future development of electrocatalysts for the HER.

Gas Phase Dehydrochlorination of 1,1,2-Trichloroethane over Zn/SiO₂ Catalysts: Acidity and Deactivation

HU Yi-Hao SONG Tong-Yang
WANG Yue-Juan HU Geng-Sheng
XIE Guan-Qun LUO Meng-Fei

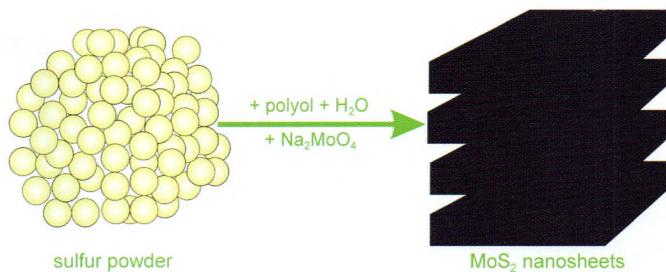

Acta Phys. -Chim. Sin. 2017, 33 (5), 1017–1026

During the gas-phase dehydrochlorination of 1,1,2-trichloroethane (TCE), Zn/SiO₂ had high TCE conversion (98%) and excellent selectivity to *cis*-1,2-dichloroethylene (82%). The weak acid centers of Zn/SiO₂ were catalytic active sites for the dehydrochlorination of TCE while the strong acid sites on the catalyst surface were responsible for coke deposition and deactivation of the Zn/SiO₂ catalysts.

Acta Phys. -Chim. Sin. 2017, 33 (5), 1033–1042

This study developed a green hydrothermal method for the synthesis of highly monodisperse hierarchical (BiO)₂CO₃ micropompons self-assembled by single-crystalline nanosheets with exposed {001} facets. Urea played multiple roles in the formation of the (BiO)₂CO₃ crystals. The self-assembled (BiO)₂CO₃ micropompons presented improved photocatalytic activity relative to other reported values.
