## Contents

|  |  |
|--|--|
| <b>Early-warning and risk management of international petroleum price</b> .....  | GAO Xin-wei MA Hai-xia (273)   |
| <b>Integrated risk measurement of Chinese commercial banks and its sensitivity — Based on the financial data of Chinese commercial banks and the open data of the financial market</b> ..... | WANG Dong-hua HUANG Kang GONG Pu (284)                               |
| <b>High-frequency volatility features, forecast model and performance evaluation</b> .....   | CHEN Lang-nan YANG Ke (296)  |
| <b>Chinese stock market's jumping characteristics under the major events</b> .....   | GUO Wen-jing DENG Ming-guang DONG Qi (308)                           |
| <b>Multifractal analysis of Japan and China stock markets in different economy periods</b> .....   | ZHANG Lin LIU Chun-yan (317)   |
| <b>Impact of banking capital regulation on economic fluctuation</b> .....  | KE Kong-lin FENG Zong-xian CHEN Wei-ping (329)                       |
| <b>On the method of economic capital allocation of commercial banks based on coherence principle</b> .....   | PENG Jian-gang WU Yun MA Ya-fang (338)                               |
| <b>Impacts of USA's carbon motivated border tax adjustments on China's economy: An analysis based on dynamic computable general equilibrium model</b> .....                                  | BAO Qin TANG Ling WANG Shou-yang QIAO Han (345)                      |
| <b>A model for short-term load forecasting in power system based on multi-AI methods</b> .....   | ZHANG Qun-hong (354)   |
| <b>Impact of water price adjustment based on input-output price model</b> .....  | NI Hong-zhen WANG Hao ZHAO Bo MA Wei (363)                           |
| <b>Evolutionary game analysis of duopoly's remanufacturing entry decision</b> .....  | GUO Jun-hua LI Bang-yi NI Ming (370)                                 |
| <b>Disruption management model and algorithm for distribution vehicle scheduling problems under accidental travel time delay</b> .....   | WANG Zheng HU Xiang-pei WANG Xu-ping (378)                           |
| <b>Clustering method for panel data based on adaptive weighting</b> .....  | LI Yin-guo DAI Yi HE Xiao-qun (388)                                  |
| <b>Influence of ability heterogeneity on sabotage behavior among agents: Experimental evidence</b> .....   | YAN Wei LIU Yan-chun DENG Hong (396)                                 |
| <b>Follow-up audit model of government investment project based on synergy theory</b> .....  | LI Dong WANG Yao-wu SONG Hui ZHAO Li-dan (405)                       |
| <b>Social, economic and resource environment composite system of co-evolution — Case of Dalian</b> .....   | FAN Fei SUN Cai-zhi WANG Xue-ni (413)                                |
| <b>Social influence, opinion dynamics and structure balance: A simulation study based on Hopfield network model</b> .....  | LI Zhen-peng TANG Xi-jin (420)                                       |
| <b>Evolution of discipline knowledge network in China — Empirical data from 1981 to 2010</b> .....   | LIU Chen SHAN Wei YU Jing (430)                                      |
| <b>Evolution model for scientific knowledge networks</b> .....   | MA Fei-cheng LIU Xiang (437)   |
| <b>A traffic signal control method for an isolate intersection based on heuristic search and feedback correction</b> .....   | JIA Ning MA Shou-feng (444)  |
| <b>Calculation method for station-end turn-back capacity of urban rail transit based on train traction</b> .....   | ZHANG Zeng-yong MAO Bao-hua JIANG Yu-kun ZHU Yu-ting (450)           |
| <b>A stochastic system optimum congestion pricing model under endogenous equilibrated market penetration and compliance rate of ATIS</b> .....   | ZHONG Shao-peng DENG Wei BAO Dan-wen (456)                           |
| <b>Agent-based simulation model of customer behavior and personalized recommendation</b> .....   | JIN Chun ZHANG Yi-ping (463)   |
| <b>Multi-attribute group decision making method based on hybrid evaluation matrix</b> .....  | QI Xiao-wen LIANG Chang-yong HUANG Yong-qing DING Yong (473)         |
| <b>DEA ranking method based upon virtual envelopment frontier and TOPSIS</b> .....   | BIAN Yi-wen XU Hao (482)   |
| <b>Constructing methods of new buffer operators with variable weights and their inner link</b> .....   | GAO Yan ZHOU De-qun LIU Chen-chen ZHANG Ling (489)                   |
| <b>Architecture research of autonomous decentralized test system</b> .....   | GAO Cheng-jin XIAO Ming-qing SHENG Sheng CHENG Jin-jun (498)         |
| <b>Prediction of gas emission from coalface by intrinsic mode SVM modeling</b> .....   | LIU Jun-e AN Feng-ping LIN Da-chao GUO Zhang-lin ZHANG Li-ning (505) |
| <b>Integrated approach research to GTST-MLD and Petri nets of Expo capacitor automobiles' safety assessment</b> .....  | DONG Da-min ZUO Fen (512)  |
| <b>An attrition model with global network efficiency</b> .....   | TAN Dong-feng (521)  |
| <b>System risk analysis and evaluation approach based on fuzzy evidential reasoning</b> .....  | JIANG Jiang LI Xuan XING Li-ning CHEN Ying-wu (529)                  |
| <b>Quantitative assessment of flight risk based on extreme value theory</b> .....  | XUE Yuan XU Hao-jun HU Meng-quan (538)                               |
