河北同业
冶金科技有限责任公司

(原河北省故城县同业高耐磨材料厂)，建于1998年，公司主要生产高耐磨含油尼龙系列产品，圆筒混合机衬板、料仓衬板、多辊布料器、辊筛及各类耐磨轴承、轴瓦，并根据用户要求设计及加工各类耐磨易损件，NZ-HA型含油尼龙获国家发明专利并获金奖，高耐磨自润滑含油尼龙筛分机筛辊项目荣获河北省优秀科技成果。

CONTENTS

Engineering Research

- Finite element analysis of seismic behavior of high bridge pier made of concrete-filled round steel pipe Zhang Hongwu et al. (1)
- Non-linear finite element analysis of simply supported steel-concrete composite beam Han Na et al. (6)
- Numerical simulation research of ground surface settlement caused by construction of tunnel with shallow depth excavation Chen Jing et al. (10)
- Calculation and analysis of rigid pile composite foundation settlement Liu Dehui et al. (14)
- Hazard analysis on groundwater depression cones and establishment of mathematical model for groundwater level at the center Zhao Jian (18)
- Study on injecting CO₂ to release retrograde condensation and water lock pollution Fan Hutxian et al. (21)

Engineering Design

- Bridge design for landscape road of Wenzhou urban flood dike phase III project Yang Weijia (24)
- On design of new campus of vocational education center in Cili county Qu Fei, Wu Peng (27)
- Design and construction of 0[#] section bracket for rigid frame of thin wall and tall pier Li Jinjin (31)
- Study on vectorization of topographic map of optical grating based on AUTOCAD software and CASScan5.0 software Zhang Xinrong (34)

Engineering Construction

- Stress analysis on structure displacement of jacking construction of continuous box-girder bridge Zhou Chenying et al. (36)
- Application of construction monitoring control technology in Tianjin Ziya river bridge construction Ji Yingrui (40)
- Experimental study on excavation of rock anchored beam for underground plant building Song Guowei et al. (43)
