

# 应用力学学报

第 28 卷      第 3 期      总第 109 期

2011 年 06 月 15 日出版

## 目 次

### 基于混合网格 Navier-Stokes 方程的并行隐式计算方法研究

..... 郑冠男 邓守春 韩同来 杨国伟 (211)

粘滞和粘弹性阻尼器减震结构的随机响应特性 ..... 李创第 葛新广 陆运军 (219)

基于蚁群算法的结构拓扑优化方法 ..... 张卓群 李宏男 黄连壮 (226)

基于改进粒子群算法的翼型多目标优化研究 ..... 王荣伟 高正红 (232)

一种基于混合策略的自适应多输出高斯过程响应面法 ..... 刘信恩 肖世富 莫 军 (237)

基于能量原理的双稳态各向同性柱壳力学特性研究 ..... 吴耀鹏 (243)

### 复杂地形条件下 WENO-Roe 方法在浅水模拟中的改进

..... 王党伟 余明辉 陈建国 吉祖稳 (249)

轴向变速粘弹性 Rayleigh 梁的参数共振稳定性 ..... 胡超荣 唐有绮 丁 虎 陈立群 (254)

旋转圆环动态特性的行波解 ..... 唐 亮 黄迪山 朱晓锦 (259)

气体钻水平井环空冲蚀能量分析 ..... 万里平 魏 纳 孟英峰 李永杰 李 皋 (266)

轮带系统横向振动的行波消去法 ..... 余小刚 张 伟 (270)

蜂窝夹层板结构等效模型比较分析 ..... 张铁亮 丁运亮 金海波 (275)

无网格 MLPG 法求解轴对称弹性体扭转问题 ..... 郑健龙 杨建军 (283)

### 气体模型对再入飞行器气动力热环境影响的数值研究

..... 任淑杰 张收运 董龙雷 闫桂荣 (288)

### 高超声速飞行器大面积热防护系统的传热数值分析

..... 刘 斌 刘刚伟 徐 绯 汤忠斌 (294)

裂纹损伤对塔壳结构动态特性的影响研究 ..... 陈玲莉 彭海强 陈振茂 (299)

销钉耳片连接件接触应力分析的能量解法 ..... 杨东升 胡伟平 吕来清 (304)

等离子体诱导圆锥前体流场的 PIV 测量 ..... 马 冲 李华星 孟宣市 罗时钧 刘 锋 (308)

基于可能失效模式的拱坝安全度评价 ..... 夏 雨 张仲卿 赵小莲 黄 俊 (313)

固定接触界面法向静弹性刚度 ..... 田红亮 朱大林 秦红玲 (318)

英文摘要 ..... ( I ~viii)

期刊基本参数 CN61-1112/O3\*1984\*S\*A4\*122\*zh\*p\*¥35\*1000\*20\*2011-06

## CONTENTS

|                                                                                                                               |                                                              |
|-------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------|
| An implicit parallel computing method based on the Navier-Stokes equations with hybrid grids<br>.....                         | Zheng Guannan Deng Shouchun Han Tonglai Yang Guowei ( i )    |
| Random response characteristics of dissipation structures with viscous and viscoelastic dampers<br>.....                      | Li Chuangdi Ge Xinguang Lu Yunjun ( i )                      |
| The structural topology optimization based on ant colony optimization<br>.....                                                | Zhang Zhuoqun Li Hongnan Huang Lianzhuang ( ii )             |
| Improved multi-objective particle swarm optimization algorithm for aerofoil aerodynamic optimization design for aerofoil..... | Wang Rongwei Gao Zhenghong ( ii )                            |
| An adaptive multi-output gaussian process response surface method based on mixed strategies<br>.....                          | Liu Xin'en Xiao Shifu Mo Jun ( ii )                          |
| Study on mechanical behavior of bi-stable isotropic cylindrical shell based on the principle of minimum strain energy .....   | Wu Yaopeng ( iii )                                           |
| Improve on WENO-Roe method for simulation of shallow water with complicated topography<br>.....                               | Wang Dangwei Yu Minghui Chen Jianguo Ji Zuwen ( iii )        |
| The parameter stability resonance of axially accelerating viscoelastic Rayleigh beam<br>.....                                 | Hu Chaorong Tang Youqi Ding Hu Chen Liqun ( iv )             |
| A traveling wave approach for dynamic characters of rotating circular rings<br>.....                                          | Tang Liang Huang Dishan Zhu Xiaojin ( iv )                   |
| The erosive energy analysis in annular gas drilling horizontal wells<br>.....                                                 | Wan Liping Wei Na Meng Yingfeng Li Yongjie Li Gao ( iv )     |
| Transverse vibration control of belt drive systems by wave cancellation method<br>.....                                       | Yu Xiaogang Zhang Wei ( v )                                  |
| Comparative analysis of equivalent models for honeycomb sandwich plates<br>.....                                              | Zhang Tieliang Ding Yunliang Jin Haibo ( v )                 |
| Solving torsion problems of axisymmetric elastic body by meshless local Petrov-Galerkin (MLPG) method<br>.....                | Zheng Jianlong Yang Jianjun ( v )                            |
| Thermal and chemical gas models effect on the simulation of aerodynamic force and heat for reentry vehicles<br>.....          | Ren Shujie Zhang Shouyun Dong Longlei Yan Guirong ( vi )     |
| Numerical analysis of thermal protection system heat transfer for hypersonic vehicle<br>.....                                 | Liubin Liugangwei Xu Fei Tang Zhongbin ( vi )                |
| Crack detection based on vibration signals in tower structures<br>.....                                                       | Chen Lingli Peng Haiqiang Chen Zhenmao ( vii )               |
| The energy approach to contact stress analysis of pinned connections<br>.....                                                 | Yang Dongsheng Hu Weiping Lü Laiqing ( vii )                 |
| PIV study of induced flowfield on steady and periodic-pulsed dielectric-barrier-discharges<br>.....                           | Ma Chong Li Huaxing Meng Xuanshi Luo Shijun Liu Feng ( vii ) |
| Safety analysis of arch dam based on possible failure modes<br>.....                                                          | Xia Yu Zhang Zhongqing Zhao Xiaolian Huang Jun ( viii )      |
| Normal static elastic stiffness of fixed contact interface<br>.....                                                           | Tian Hongliang Zhu Dalin Qin Hongling ( viii )               |
