## 目 次

|                                                       |                     |          |
|-------------------------------------------------------|---------------------|----------|
| 基于渗流和水化的泥页岩破裂压力计算模型 .....                             | 赵晓姣 屈 展 樊 恒 王 萍     | 安凤菊(249) |
| 基于数值分析的模态阻尼系数获取方法 .....                               | 王建强 周苏枫             | 王 纯(254) |
| 基于奇异值分解的航空发动机转子碰摩故障特征提取方法 .....                       | 张永强                 | 易 亮(260) |
| 考虑间隙内流的陶瓷隔热瓦气动载荷分析 .....                              | 刘 悦 胡淑玲             | 夏 巍(267) |
| 随机激励下新型牵引式悬架系统的 P-分岔分析 .....                          | 田 冲 刘习军             | 张素侠(273) |
| 考虑温度影响的混凝土弹塑性本构模型及其应用 .....                           | 李 亮 姜文华 吴 俊         | 杜修力(280) |
| 微纳米尺度效应作用下充流微通道系统波动特性研究 .....                         | 王金瑞                 | 杨 洋(289) |
| 次轻页岩集料混凝土基本力学性能试验研究 .....                             | 张向冈 邓大鹏 杨健辉         | 范利丹(296) |
| 虚拟手术中人体软组织超粘弹性建模及穿刺仿真 .....                           | 朱 卓                 | 李宏胜(304) |
| 含裂纹简支梁在均布荷载作用下的内聚区模型解析函数 .....                        | 段树金 解沅衡 侯永康         | 安蕊梅(310) |
| 大跨度预应力双层组合扭网壳连续倒塌机理及其控制研究 .....                       |                     |          |
| .....                                                 | 陈 映 张晓辉 申 波 马克俭 龙海芳 | 王 惠(316) |
| 海底防沉板-桩复合基础竖向受力变形特性研究 .....                           | 孔德森 刘 一 谭晓燕         | 张 杰(326) |
| 结构柔顺度拓扑优化的倒变量准则 .....                                 | 彭细荣 熊创贤             | 李文斌(334) |
| 高温下聚氨酯软泡压缩力学性能的研究 .....                               | 黄萌萌 冯志华             | 倪俊芳(343) |
| 欠驱动航天器姿态机动时间-能量最优控制研究 .....                           | 石青鑫                 | 戈新生(349) |
| 含水平非线性弹簧的准零刚度隔振系统的力传递率研究 .....                        | 宋春芳 徐龙龙             | 刘彦琦(356) |
| 变化的气动力和电磁力对覆冰双分裂导线舞动的影响 .....                         | 伍 川 严 波 张 博 杨晓辉 吕中宾 | 李 清(364) |
| .....                                                 | 张小明 李 智 禹建功         | 王现辉(372) |
| 压电圆柱曲面中的周向导波复频散特性 .....                               | 刘中宪 张 征             | 梁建文(379) |
| 弹性半空间中含粘性滑移界面圆形衬砌洞室对平面 SH 波的散射 .....                  | 陈 巍 张 广 陈 冬         | 杨辉静(386) |
| Herschel-Bulkley 模型下磁流变减振器旁路泊肃叶流动分析 .....             |                     |          |
| 三种不同对流结构的行波斑图 .....                                   | 宁利中 刘 爽 宁碧波 袁 喆 田伟利 | 渠亚伟(394) |
| 复杂多舱室内炸药爆炸爆轰产物运动二维数值模拟研究 .....                        | 徐维铮                 | 吴卫国(400) |
| 断面风压作用下冷却塔筒内力影响线研究 .....                              | 张军锋 杨军辉 辛思远         | 朱 冰(405) |
| 非线性度对修正双步长显式法及常用逐步积分法的影响 .....                        | 杨 超 张志新             | 李 强(411) |
| 基于实验测试的采煤机截割载荷的分形分布规律研究 .....                         | 郝志勇 周正启 袁 智 雷耀龙     | 张 佩(417) |
| 扩散沉积导致的管内气溶胶穿透率简明公式 .....                             | 高永伟                 | 亢燕铭(424) |
| 两端固支各向同性叠合岩梁受均布荷载的弹性力学解 .....                         | 王 妍 姚多喜 鲁海峰         | 蒋 正(431) |
| 大跨斜拉桥拉索面内参数振动简化模型及工程应用 .....                          | 方豪杰 王修勇 罗一帆 孙洪鑫     | 彭 剑(438) |
| 钢筋混凝土空腹夹层板剪力键的静力参数化分析 .....                           | 刘盼盼 吴 帮 申 波 马克俭 赵啸峰 | 王 惠(444) |
| .....                                                 | 邱伊婕                 | 孔祥伟(453) |
| 掺稀采油管内稠油流速径向分布特性研究 .....                              | 李明飞 徐 绯             | 窦益华(458) |
| 射孔管柱振动参数实测及其 ALE 数值仿真分析 .....                         | 孙可明 王金成 辛利伟         | (466)    |
| 不同应力差条件下超临界 CO <sub>2</sub> 气爆煤岩体气楔作用次生裂纹扩展规律研究 ..... | 王 旭 袁 波 陈红鸟         | 罗 杰(473) |
| 三维风场下的不同桥梁断面形式的气动特性数值分析 .....                         | 刘 强                 | 王妙芳(480) |
| 基于首次超越破坏时间概率的结构动力可靠性分析 .....                          | 夏 雨 胡淼珍 聂宏涛         | 张泽俊(485) |
| 基于弹性应变能的钢筋混凝土简支梁极限承载力判据研究 .....                       | 鲍春雨 孟庆华             | 颜明明(492) |
| 篮球运动员急停起跳动作踝关节生物力学特征分析 .....                          |                     |          |
| 英文摘要 .....                                            |                     | (i~xx)   |

## CONTENTS

|                                                                                                                                                                              |                                                                      |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------|
| Calculation model of shale fracturing pressure based on seepage and hydration                                                                                                | Zhao Xiaojiao Qu Zhan Fan Heng Wang Ping An Fengju (i)               |
| Modal damping coefficient acquisition method based on numerical analysis                                                                                                     | Wang Jianqiang Zhou Sufeng Wang Chun (i)                             |
| The extraction of the fault features from aero-engine rotor contact-rubbing based on singular value decomposition                                                            | Zhang Yongqiang Yi Liang (ii)                                        |
| Analysis of aerodynamic loads of ceramic tiles considering internal flow                                                                                                     | Liu Yue Hu Shuling Xia Wei (ii)                                      |
| The P-bifurcation analysis of new traction suspension system with random excitation                                                                                          | Tian Chong Liu Xijun Zhang Suxia (iii)                               |
| The elasto-plastic constitutive model of concrete including effects of temperature and its application                                                                       | Li Liang Jiang Wenhua Wu Jun Du Xiuli (iii)                          |
| Dynamic characteristics of microchannel fluid-solid coupling systems in nonlocal stress fields                                                                               | Wang Jinrui Yang Yang (iv)                                           |
| Experimental study on basic mechanical properties of specified density shale aggregate concrete                                                                              | Zhang Xianggang Deng Dapeng Yang Jianhui Fan Lidan (iv)              |
| The human soft tissue hyper viscoelastic biological model and puncture simulation in virtual surgery                                                                         | Zhu Zhuo Li Hongsheng (v)                                            |
| Cohesive zone model analytic function to simply supported beam with an edge-crack under uniform distributed load                                                             | Duan Shujin Xie Yuanheng Hou Yongkang An Ruimei (v)                  |
| The progressive collapse mechanism and collapse control for long-span prestressed double-layer combined twisted lattice shell                                                | Chen Ying Zhang Xiaohui Shen Bo Ma Kejian Long Haifang Wang Hui (vi) |
| The vertical force and deformation characteristics of subsea mudmat-pile hybrid foundations                                                                                  | Kong Desen Liu Yi Tan Xiaoyan Zhang Jie (vi)                         |
| Reciprocal criterion of structural compliance topology optimization                                                                                                          | Peng Xirong Xiong Chuangxian Li Wenbin (vii)                         |
| Research on the compression mechanical properties of flexible polyurethane foam at high temperature                                                                          | Huang Mengmeng Feng Zhihua Ni Junfang (vii)                          |
| Study on time-energy optimal control for attitude maneuver of underactuated spacecraft                                                                                       | Shi Qingxin Ge Xinsheng (viii)                                       |
| The force transmissibility of a quasi-zero stiffness isolation system with horizontal nonlinear springs                                                                      | Song Chunfang Xu Longlong Liu Yanqi (viii)                           |
| Effects of varying aerodynamic and electromagnetic forces on galloping of iced twin bundle conductor lines                                                                   | Wu Chuan Yan Bo Zhang Bo Yang Xiaohui Lü Zhongbin Li Qing (ix)       |
| The complex dispersion characteristics of circumferential guided waves in piezoelectric cylindrical curved plate                                                             | Zhang Xiaoming Li Zhi Yu Jiangong Wang Xianhui (x)                   |
| Scattering of plane SH waves by a circular lining cavity with viscous-slip interface in elastic half space                                                                   | Liu Zhongxian Zhang Zheng Liang Jianwen (x)                          |
| Analysis of byroad Poiseuille flow in magnetorheological damper based on the Herschel-Bulkley model                                                                          | Chen Wei Zhang Guang Chen Dong Yang Huijing (xi)                     |
| Three types of traveling wave patterns with different convection structures                                                                                                  | Ning Lizhong Liu Shuang Ning Bibo Yuan Zhe Tian Weili Qu Yawei (xi)  |
| A two-dimensional numerical simulation study on the dynamic motion of the detonation products generated by the explosive in a complex multi-cabin                            | Xu Weizheng Wu Weiguo (xii)                                          |
| Influence functions of internal forces of cooling tower shell under section wind pressure                                                                                    | Zhang Junfeng Yang Junhui Xin Siyuan Zhu Bing (xiii)                 |
| Effects of nonlinearity on a corrected explicit method of double time steps and common step-by-step integration methods                                                      | Yang Chao Zhang Zhixin Li Qiang (xiii)                               |
| Study on fractal distribution law of cutting load of shearer based on experimental tests                                                                                     | Hao Zhiyong Zhou Zhengqi Yuan Zhi Lei Yaolong Zhang Pei (xiv)        |
| Simplified correlations of aerosol penetration through tubes with the effects of diffusional deposition                                                                      | Gao Yongwei Kang Yanming (xiv)                                       |
| Elastic solution of clamped laminated rock beam under uniformly distributed load                                                                                             | Wang Yan Yao Duoxi Lu Haifeng Jiang Zheng (xv)                       |
| FEM analysis and experimental study on planar parametric oscillations of the stayed cable                                                                                    | Fang Haojie Wang Xiuyong Luo Yifan Sun Hongxin Peng Jian (xv)        |
| Parametric analysis of shear keys in reinforced concrete open-web sandwich under static loading                                                                              | Liu Panpan Wu Bang Shen Bo Ma Kejian Zhao Xiaofeng Wang Hui (xvi)    |
| Flow velocity radial distribution characteristics of heavy oil diluted with thin oil in tube                                                                                 | Qiu Yijie Kong Xiangwei (xvi)                                        |
| Measurement of perforating column vibration parameters and ALE-based numerical simulation                                                                                    | Li Mingfei Xu Fei Dou Yihua (xvii)                                   |
| Research on the law of secondary cracks propagation in coal and rock caused by gas wedging during supercritical CO <sub>2</sub> explosion under different stress differences | Sun Keming Wang Jinyu Xin Liwei (xviii)                              |
| Aerodynamic selection research of bridge girder section in three-dimensional wind field                                                                                      | Wang Xu Yuan Bo Cheng Hongniao Luo Jie (xviii)                       |
| The reliability analysis of structures based on failure probability of first-passage time                                                                                    | Liu Qiang Wang Miaofang (xix)                                        |
| Ultimate bearing capacity criterion of reinforced concrete beam based on elastic strain energy                                                                               | Xia Yu Hu Miaozhen Nie Hongtao Zhang Zejun (xix)                     |
| Analysis of biomechanical characteristics of ankle during stop-jump for basketball player                                                                                    | Bao Chunyu Meng Qinghua Yan Mingming (xx)                            |
