CONTENTS

Commenced in May 1980

Vol. 41 No. 6 Jun. 2020 (Monthly)

Electronic band energy of a bent ZnO piezoelectric semiconductor nanowire	(833)
Wanli YANG, Yuntai HU, E. N. PAN	
A full-coupling model of PN junctions based on the global-domain carrier motions with inclusion of the two metal/semiconductor contacts at endpoints	(845)
Wanli YANG, Jinxi LIU, Yongliang XU, Yuntai HU	
Vibration analysis of piezoelectric sandwich nanobeam with flexoelectricity based on nonlocal strain gradient theory	(859)
Shan ZENG, Kaifa WANG, Baolin WANG, Jinwu WU	
Jacobian-free Newton-Krylov subspace method with wavelet-based preconditioner for analysis of transient elastohydrodynamic lubrication problems with surface asperities	(881)
N. M. BUJURKE, M. H. KANTLI	
Interaction between a screw dislocation and an elliptical hole with two asymmetrical cracks in a one-dimensional hexagonal quasicrystal with piezoelectric effect	(899)
Lianhe LI, Xiaowei CUI, Junhong GUO	
Thomson and rotation effects during photothermal excitation process in magnetic semiconductor medium using variable thermal conductivity	(909)
K. LOTFY, A. K. KHAMIS, A. A. EL-BARY, M. H. AHMED	
Analysis of thermal responses in a two-dimensional porous medium caused by pulse heat flux	(927)
T. SAEED, I. A. ABBAS	
Design and fluid-structure interaction analysis for a microfluidic T-junction with chemo-responsive hydrogel valves	(939)
E. KHANJANI, A. HAJARIAN, A. KARGAR-ESTAHBANATY, N. ARBABI, A. TAHERI, M. BAGHANI	
Assessment of force models on finite-sized particles at finite Reynolds numbers	(953)
Ruyang LI, Weixi HUANG, Lihao ZHAO, Chunxiao XU	
A highly-efficient method for stationary response of multi-degree-of-freedom nonlinear stochastic systems	(967)
Lincong CHEN, J. Q. SUN	

ISSN 0253-4827
CN 31-1650/O1
