Table of Contents

Editorial

- 222 Laparoscopic approach for hepatocellular carcinoma: where is the limit?
Giuseppe Maria Ettorre, Giovanni Battista Levi Sandri
- 224 The unique phenotypes of adenocarcinoma of the esophagogastric junction in China
Min Feng, Wenxian Guan
- 226 Adenocarcinoma of esophagogastric junction: controversial classification, surgical management, and clinicopathology
Lei Huang, A-Man Xu
- 231 Comments to young surgeons concerning laparoscopic spleen-preserving D2 lymph node dissection for advanced gastric cancer on the upper body
Yoon Young Choi, Ji Yeong An, Woo Jin Hyung, Sung Hoon Nob
- 234 Laparoscopic resection for hepatocellular carcinoma: eastern and western experiences
Paulo Herman, Fabricio Ferreira Coelho
- 237 Lymph node metastasis and lymphadenectomy of resectable adenocarcinoma of the esophagogastric junction
Xin-Zu Chen, Wei-Han Zhang, Jian-Kun Hu
- 243 Laparoscopic liver resection: western versus eastern experience
Fiona KM Chan, Kai Chi Cheng
- 245 Laparoscopic resection for hepatocellular carcinoma: comparison between Middle Eastern and Western experience
Hong-Jin Kim, Man-Ki Kim

Original Article

- 247 Clinical analysis of intracranial germinoma's craniospinal irradiation using helical tomotherapy
Baolin Qu, Lei Du, Yurong Huang, Wei Yu, Boning Cai, Shouping Xu, Lin Ma
- 255 A systemic review of glutathione S-transferase P1 Ile105Val polymorphism and colorectal cancer risk
Qi-Bin Song, Qi Wang, Wei-Guo Hu
- 268 Erythropoiesis-stimulating agents in the management of cancer patients with anemia: a meta-analysis
Xiaomei Li, Zhi Yan, Dexiao Kong, Wen Zou, Jibua Wang, Dianshui Sun, Yubua Jiang, Chengyun Zheng
- 277 Internal compared with external drainage of pancreatic duct during pancreaticoduodenectomy: a retrospective study
Guangxing Meng, Qianzhe Xing, Qiang Yuan, Zhi Du, Yijun Wang, Hua Meng
- 285 Characteristics and trends in incidence of childhood cancer in Beijing, China, 2000-2009
Lei Yang, Yannan Yuan, Tingting Sun, Huichao Li, Ning Wang

- 293 **Report of China's innovation increase and research growth in radiation oncology**
Hongcheng Zhu, Xi Yang, Qin Qin, Kangqi Bian, Chi Zhang, Jia Liu, Hongyan Cheng, Xinchen Sun
- 299 **"Wrapping the gastroduodenal artery stump" during pancreatoduodenectomy reduced the stump hemorrhage incidence after operation**
Chang Xu, Xinwei Yang, Xiangji Luo, Feng Shen, Mengchao Wu, Weifeng Tan, Xiaoqing Jiang
- 309 **Risk factors of intra-abdominal bacterial infection after liver transplantation in patients with hepatocellular carcinoma**
Kai Nie, Rongzheng Ran, Weifeng Tan, Bin Yi, Xiangji Luo, Yong Yu, Xiaoqing Jiang
- 315 **Association between hsa-miR-34b/c rs4938723 T > C promoter polymorphism and cancer risk: a meta-analysis based on 6,036 cases and 6,204 controls**
Tao Tao, Shuqiu Chen, Bin Xu, Chunhui Liu, Yiduo Wang, Yeqing Huang, Ming Chen
- 323 **Prognostic significance of ERCC1 expression in postoperative patients with gastric cancer**
Jian Wang, Xi-Qiao Zhou, Jing-Ying Li, Jian-Feng Cheng, Xiao-Ning Zeng, Xiao Li, Ping Liu

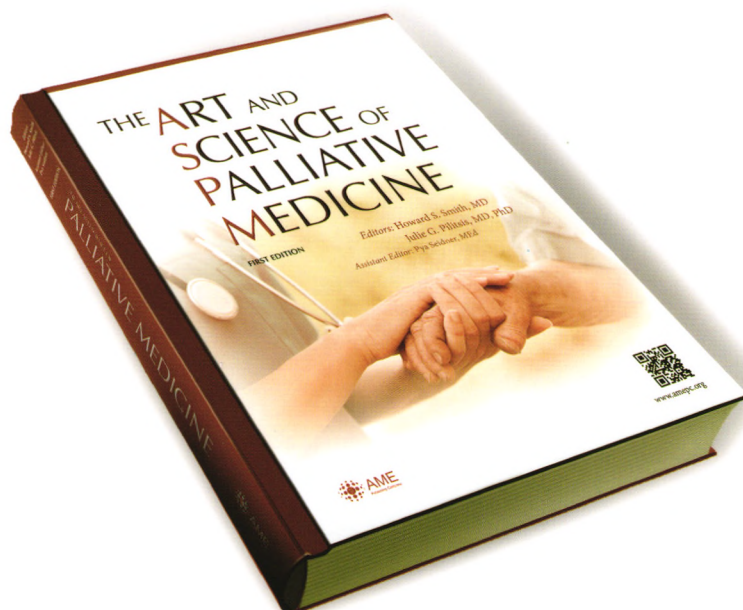

Clinical Practice

- 331 **Diagnosis and management of acute complications in patients with colon cancer: bleeding, obstruction, and perforation**
Xue-Fei Yang, Kai Pan

Case Report

- 341 **Severe acute pancreatitis due to tamoxifen-induced hypertriglyceridemia with diabetes mellitus**
Young Ae Kim, Sol Lee, Ji Woong Jung, Yu Jin Kwon, Gyeong Bok Lee, Dong Gue Shin, Sang Su Park, Jin Yun, Yong-Seog Jang, Dong Hui Cho
- 345 **Synchronous primary cancers of trachea and esophagus and ventricular tachycardia**
Wen Luo, Guomin Luo, Youling Gong, Jin Wang
- 351 **Primary malignant melanoma of uterine cervix: a suggestion of new scheme of treatment combination**
Kyung-Jin Min, Yeun-Sun Kim, Jin-Hwa Hong, Jae-Kwan Lee, Dae-Sik Yang
- 355 **Synchronous breast cancer and breast lymphoma: two case reports and literature review**
Jia Zhong, Lijun Di, Wen Zheng

ISBN: 978-988-12997-2-7 (hardback)
ISBN: 978-988-12997-3-4 (eBook)

Pya Seidner, MEd

Page count: 598

The goal of the book was to provide a resource that is usable in all countries, providing straightforward data as well as food for thought for providers worldwide. Its design by Howard Smith, MD, was brilliant in its simplicity as well as its breadth of coverage. It is useful both for the student and resident physician being first exposed to death and dying as well as the palliative care specialist that may be an expert in one facet of the patient's disease, but not in others. After reading this book, it was Dr. Smith's goal to arm the reader with a new set of tools in their daily responsibility and to be the best provider possible for their patients. It is meant to spawn interest in further reading on topics of interest and to promote future directions of study.

Julie G. Pilitsis, MD, PhD
Albany, NY, USA

"... to cure sometimes, to relieve often, to comfort always."

Attributed to Dr. Edward Livingston Trudeau, founder of a 19th century tuberculosis sanatorium, this could easily be a defining slogan for palliative care because nearly all care models highlight the reigning importance of the individual as the central point of care.

Amy P. Abernethy, M.D., Ph.D.
Current President, American Academy of Hospice & Palliative Medicine;
Duke University School of Medicine, Durham, USA
