“The contributions of Arima to human endeavor are incredible. In Science, he has been one of the driving forces in the World for the development of Nuclear Theory in the second part of the 20th Century. In Education, he has led the research of many students and post-doctoral fellows who now occupy important positions worldwide. In Science Policy, Arima has been one of the leading figures both in Japan and Worldwide.”

Francesco Iachello  
Yale University, USA

“Professor Akito Arima has made seminal contributions to the theory of nuclear structure. Starting with his famous paper, with Horie, on nuclear magnetic moments, continuing with important papers, culminating with the introduction, with Iachello, of the interacting boson model, described by Feshbach as leading to ‘a renaissance in nuclear structure physics’.”

Igal Talmi  
The Weizmann Institute of Science, Israel

“目光深邃，核界泰斗；倾心奉献，中日友好。”

陈佳洱  
Peking University, China
