CONTENTS

Air Pollution Control

Investigating the temporal and spatial variabilities of total ozone over China for the past 50 years	XIE Jing-han et al. (2977)
Analysis on the potential source and transmission channel of particulate matter in Lüliang City, Fenwei Plain	GAO Xing-ai et al. (2988)
Filling the missing data of AOD using the <i>situ</i> PM _{2.5} monitoring measurements in the Beijing-Tianjin-Hebei region	SONG Chun-jie et al. (3000)
Influence of a boundary layer low-level jet on pollutant diffusion in Shouxian, Anhui Province in winter 2016	JING Cui-wen et al. (3011)
Characteristics and sources of ozone and its precursors around the Wuhan Military Games	MA Jing et al. (3023)
Determination of crustal element iron light absorption contribution and effects on black carbon light absorption enhancement estimation: a case study in Wuhan	TAN Jian et al. (3033)

Measurement of emission fluxes of total non-methane alkanes from refineries using solar occultation flux remote sensing technique	LI Ling-bo et al. (3046)
Traceability and emission characteristics analysis of VOCs from typical plates in customized furniture	TIAN Jiao et al. (3058)
On-line characterization of nitrated polycyclic aromatic hydrocarbons in naphthalene secondary organic aerosol	HU Hui-min et al. (3068)
Experimental study on electrostatic precipitator removal of fine particles with pre mixed spray	DENG Quan-long et al. (3077)
Catalytic performance of FeMn-based monolithic catalysts for toluene and chlorobenzene catalytic combustion	WANG Xiao-qiang et al. (3084)

Water Pollution Control

Effect of FeS on reactive brilliant red X-3B removal effect and degradation process in CW-MFC system	ZHAO Lian-fang et al. (3093)
Degradation of sulfamethoxazole in water by Fenton-like method using Fe ₃ O ₄ -nZVI	XIE Xin-zhuo et al. (3103)
Preparation of g-C ₃ N ₄ nanosheets doped with proline and its degradation of RhB	JIANG Jun et al. (3112)
Start-up and performance study on the simultaneous nitrification-endogenous denitrification phosphorus removal (SNEDPR) in the biological process of the moving bed biofilm reactor (MBBR)	JING Shuang-yi et al. (3121)
Photocatalytic reduction of Cr(VI) by pyridine doped graphitic carbon nitride	LIU Fang-yuan et al. (3130)
Alternating electric field combined with iron-modified biomass to enhance the deep-dewatering of municipal sludge	LI Ya-lin et al. (3140)
Effect of EDTA-2Na/Fe(II) on nitrate reduction in autotrophic biological system	ZHANG Wen-bo et al. (3149)
Sludge-based biochar enhances treatment performance of activated sludge systems	ZHAO Bing et al. (3156)
Study on dye removal by dual Z-Scheme MIL-88A (Fe)/Ag ₃ PO ₄ /AgI photo-Fenton catalyst	BAN Sa et al. (3164)
Enhanced removal of Cd(II) from aqueous solution by nanoscale zero-valent iron coupled with white rot fungus	ZENG Qiao-jing et al. (3174)
Preparation of carbonized melamine sponge for photo assisted heavy oil adsorption	LIN Zi-mei et al. (3184)
Effects of background ion types and concentrations on the co-transport of polystyrene microplastics / lead in saturated quartz sand	CHANG Bo-kun et al. (3193)
Study of DOM removal in surface water by forward osmosis	WEI Yong et al. (3204)
Enhancement of glucocorticoid reduction transformation by PRB modified with rGO@nZVI-BC	SUN Bo-yu et al. (3212)
Uncertainty analysis of groundwater pollution simulation model	LUO Cheng-ming et al. (3224)
Numerical simulation of groundwater remediation of hexavalent chromium contaminated site by the bio-permeable reactive barrier	DIAO Wen-qin et al. (3234)
Stochastic simulation of groundwater pollution considering uncertainty of parameters and boundary conditions	XU Ya-ning et al. (3244)

Solid Waste

Physicochemical properties and reuse of municipal solid waste fine fraction: Case of an aged landfill site in Zhejiang Province	ZHENG Kang-qi et al. (3254)
---	-----------------------------

Soil Pollution Control

Pollution characteristics and environmental risks of ammonia nitrogen in retired nitrogen fertilizer plant sites	CHEN Yun et al. (3265)
Shear strength and leaching characteristics of solidified lead-zinc-cadmium composite heavy metal contaminated soil under long-term freeze-thaw cycles	WANG Yao et al. (3276)
Optimization of microplastics extraction from soil by density separation	LIN Jing et al. (3285)
Screening of soil test plants and developing of their toxicity prediction models in China	LUO Jing-jing et al. (3295)

Environmental Ecology

Spectral characteristics of dissolved organic matter in the overlying water from Nanyi Lake	LI Hai-bin et al. (3306)
Spatial distribution and influencing factors of microplastics in water of Ulanhuai	HAO Ruo-nan et al. (3316)
Analysis on spatial-temporal characteristics and Environmental Kuznets Curve of non-point source pollution in the Three Gorges Reservoir Area	FENG Lin et al. (3325)
Patterns of nitrogen and phosphorus losses in two catchments with contrasting underlying surfaces	XU Guang-zhi et al. (3334)
Identification and diagnosis of critical areas for ecological rehabilitation based on eco-security patterns and ecological vulnerability assessment - a case study over Wenshang County	LIU Jin-hua et al. (3343)
The water quality criteria and ecological risks of copper under the influence of multiple factors	LIU Na et al. (3353)
Effect of halogen ions on photochemical activity of dissolved black carbon	TU Yi-na et al. (3362)
Correlation between biochar pore structure-nitrogen defects and tetracycline hydrochloride degradation	WANG Qing et al. (3370)
Application of confocal Raman microscopy on the structure of sludge-based biochar	HUANG Ting et al. (3378)
HPLC-MS-MS method for low level DNA methylation value determination in ecological species	HU Jun-jie et al. (3385)
Community characteristics of soil macrofauna and its influencing factors at Rating Forest	WANG zhuang-zhuang et al. (3392)

Carbon Emission Control

Carbon emission from coastal container ports in China based on AIS data	CHEN Wei-jie et al. (3403)
Medium- and long-term carbon emission forecast and technological emission reduction potential analysis of China's civil aviation industry	XU Ji-hui et al. (3412)

Environmental Microbiology

Effects of earthworms on the antibiotic resistance genes of vermicompost from dewatered sludge revealed by active microbes	WEI Feng-yi et al. (3425)
Survival and aggregation characteristics of bacteriophage MS2 in anaerobic water environment and influence of physicochemical factors	ZHANG Chong-miao et al. (3434)

Study of minor 2-EH surfactant on promoting LiCl liquid desiccant to inactivate mold in air-conditioning systems	LI Rui-qing et al. (3443)
--	---------------------------

Environmental Toxicology and Health	ZHANG Li et al. (3450)
-------------------------------------	------------------------

Effects of short-term exposure to PM _{2.5} and PM ₁₀ on blood pressure in adults in Jinchang City	ZHANG Li et al. (3450)
---	------------------------

Biodiversity

Survival status and protection effectiveness of <i>Paphiopedilum</i> Subgenus. <i>Brachypetalum</i> in China	ZHANG Yang et al. (3461)
--	--------------------------
