Come See What This Chinese Company Achieved in the Global High-End Market!

China is known to all as the “world factory”, and goods made in China are all over the world. However, much to our regret, the labels on made-in-China goods such as “low-end” and “cheap” seem to be hard to tear off. Searching for the reason

behind, we could see it lie in the fact that products “made in China” have made little achievement in the high-end market. But with the faith and courage to climb up on top of Mount Everest, XCMG has strutted into the global high-end market.

CMIF Released 2016 Report on Manufacturing Machinery Industry: Which Sectors Gain the Most Growth?

On the morning of Feb 14, China Machinery Industry Federation held a press conference to report on the development of manufacturing machinery industry during 2016. Statistics show that main economic indicators in the industry

have picked up against the lower level last year with growth rates higher than expectation. But there are still unwelcomed figures showing too fast of the decline in investment growth, and import and export of trade continuing to drop.
