Shanghai Electric's New Generation of Ultra-fast and Ultra-clear CT Scanner Is Here

As a rising star in China's medical field, Shanghai Kangda Medical Equipment Group Corporation under Shanghai Electric has been actively developing business in new areas in recent years, and has launched a variety of 16-slice, 32-slice and 64-slice CT scanners in just four years. The company last year also launched Apsaras 128, a 64-row 128-slice CT scanner.

The biggest feature of this equipment is its ultra-fast scanning speed, which is enough to meet inspection needs of such body parts as coronary artery and pulmonary artery.
