**CMES 会刊**  
中国机械工程学会

**23**

2017 Vol.28  
半月刊

目次

机械基础工程

基于字典相干性优化的稀疏分类在发动机空燃比故障识别中的应用 ..... 吴士力 唐振民 刘 奇(2773)

管道内压力对纵模导波传播特性的影响 ..... 蔡海潮 徐春广 王东峰等(2779)

桨-毂轴承材料扭动微动磨损行为研究 ..... 周明琢 张耕培 卢文龙等(2785)

轻型操作臂结合部弹性约束动力学特性及实验研究 ..... 刘玉飞 张 席 李 威等(2792)

3-RSR/SP 并联车载天线机构运动及力学特性分析 ..... 侯雨雷 赵亚杰 周治宇等(2799)

基于混沌混合的分合式微混合器研究 ..... 史冬冬 李金贝奇 王瑞金等(2809)

声表面波相关叉指换能器的半物理仿真 ..... 陈智军 钟悦芸 陈 涛等(2816)

UN R129 侧碰数值模拟的 3 岁儿童损伤风险研究 ..... 韩 勇 潘 迪 田丰翼等(2821)

基于多维度空间耦合的六足机器人步态规划 ..... 艾青林 阮惠祥 陈教料等(2829)

基于空间填充法的刀具路径生成算法及其仿真 ..... 隋秀凇 陈晓奇 焦 艳等(2839)

车身接头刚度测量原理与测量装置设计 ..... 陈少伟 陈 涛 汤 毅等(2846)

准零刚度绝对位移传感器设计及运用 ..... 何剑锋 邓兆祥 妥吉英(2853)

可持续制造

混合动力船舶模式切换过程力矩协调控制 ..... 朱剑昀 陈 俐 彭 程(2859)

差动轮系动态跟随性能研究 ..... 徐 琳 刘 凯 崔亚辉等(2868)

基于多源信息的复杂装备测试性评估 ..... 张 雷 梁德潜 查晨东(2875)

先进材料加工工程

搅拌摩擦焊和热处理复合工艺对 2219 铝合金组织性能的影响 ..... 李小霞 黄 亮 李建军等(2880)

TC17 钛合金在高温与高应变率下的动态压缩力学行为研究 ..... 牛秋林 陈 明 明伟伟(2888)

激光烧蚀铝合金表面对其胶接接头耐腐蚀性能的影响 ..... 朱传敏 吕珊珊 梅 雨等(2893)

学会动态

创新驱动发展 建设制造强国——2017 年中国机械工程学会年会在山东济南召开(2858)

编读往来

《中国机械工程》第五届编委会(封 2) 中国机械工程杂志社第四届董事会(XLV)

CONTENTS(2898)

|                                                                                                                                                                       |                                                                                                                          |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------|
| Recognition Applications for Air Fuel Ratio Faults of Gasoline Engines Using Sparse Representation Classification Based on Optimization of Dictionary Coherence ..... | dimensional Space Coupled .....                                                                                          |
| WU Shili et al(2773)                                                                                                                                                  | AI Qinglin et al(2829)                                                                                                   |
| Effects of Pipe Pressures on Longitudinal Mode Guided Wave Propagations .....                                                                                         | Toolpath Generating Method and Simulation Based on Space-filling Curves .....                                            |
| CAI Haichao et al(2779)                                                                                                                                               | SUI Xiulin et al(2839)                                                                                                   |
| Research on Torsional Fretting Wear Behaviors of Material in Hub Bearings .....                                                                                       | Measuring Pirinciples and Measuring Device Design of Joint Stiffness of Car Bodys .....                                  |
| ZHOU Mingzhuo et al(2785)                                                                                                                                             | CHEN Shaowei et al(2846)                                                                                                 |
| Dynamics Properties and Experimental Investigations for Light Manipulators with Elastic Restraint Joints .....                                                        | Design and Applications of a QZS Absolute Displacement Sensor .....                                                      |
| LIU Yufei et al(2792)                                                                                                                                                 | HE Jianfeng et al(2853)                                                                                                  |
| Kinematic and Mechanics Characteristic Analysis of 3-RSR/SP Parallel Vehicle-borne Antenna Mechanisms ...                                                             | Torque Coordination Control during Mode Transitions for a HybridShip .....                                               |
| HOU Yulei et al(2799)                                                                                                                                                 | ZHU Jianyun et al(2859)                                                                                                  |
| Investigation on Splitting-merging Micromixers Based on Chaotic Mixing .....                                                                                          | Dynamic Tracking Performance Analysis of Differential Gear Trains .....                                                  |
| SHI Dongdong et al(2809)                                                                                                                                              | XU Lin et al(2868)                                                                                                       |
| Semi-physical Simulation of SAW CIDTs .....                                                                                                                           | Testability Evaluation of Complex Equipment Based on Multi-source Informations .....                                     |
| CHEN Zhijun et al(2816)                                                                                                                                               | ZHANG Lei et al(2875)                                                                                                    |
| Research on Injury Risks of 3 Year-old Children Using Numerical Simulations of Side Impacts in UN R129 .....                                                          | Effects of Compound Technology of FSW and Heat Treatment on Microstructures and Properties of 2219 Aluminum Alloys ..... |
| HAN Yong et al(2821)                                                                                                                                                  | LI Xiaoxia et al(2880)                                                                                                   |
| Gait Planning of a Hexapod Robot Based on Multi- .....                                                                                                                | Study on Dynamic Compressive Mechanics Behavior of TC17 Titanium Alloy at High Temperature and High Strain Rates .....   |
|                                                                                                                                                                       | NIU Qiulin et al(2888)                                                                                                   |
|                                                                                                                                                                       | Effects of Laser Ablation on Corrosion Resistance of Adhesive-bonded Aluminum Joint .....                                |
|                                                                                                                                                                       | ZHU Chuanmin et al(2893)                                                                                                 |
