CONTENTS

Reproducibility Evaluation of Multi-Site Stochastic Weather Generators: a Comparison between a Typical
Parametric Model and a Non-Parametric ModelZHOU Ling-feng, et al (341)
Physiological Response of Plant Millet to Simulated Carbon Capture and Storage of CO2 Leakage
JI Xiang, et al (350)
Simulation of the Dynamic Response of Dry Matter Accumulation of Spring Maize in Northeast China to Sowing Dates
and Varieties Based on Normalization MethodZHANG Bing-bing, et al (357)
Effect of Water and Nitrogen Coupling on Nitrogen Metabolism Enzyme Activities in Grapevine Seedling Leaves
LI Jia-shuai, et al (368)
Identification on Cold Damage Year Based on Accumulated Equivalent Temperature during Rice Growth Season in
Cold RegionZHU Hai-xia, et al (380)
Comprehensive Risk Regionalization of Meteorological Index Insurance for High Temperature Heat Damage of Rice
in Jiangsu Province
A Weather-index-based Insurance-oriented Method for Hail Disaster Assessment on Fruits Loss
LUAN Qing-zu, et al (402)
