

中国铁道科学

第 32 卷第 2 期(总第 116 期)2011 年 3 月

目 次

湿陷性黄土铁路路基原位浸水试验研究	姚建平, 蔡德钧, 闫宏业, 等(1)
斜坡软弱地基路堤工程特性的数值模拟	刘晋南, 蒋 鑫, 邱延峻(8)
刚性桩桩网复合地基桩顶段桩间土附加应力分析	刘俊飞, 赵 健, 赵国堂, 等(15)
地铁运营引起的环境低频振动传播特征试验研究	丁德云, 刘维宁, 李克飞, 等(20)
轨道交通振动对建筑物影响程度的预测方法	马 蒙, 刘维宁, 金 浩, 等(27)
轨道型式对地铁与建筑物共建结构振动响应的影响	周 萌, 韦 凯, 周顺华, 等(33)
基于桥梁基准有限元模型的列车—桥梁空间耦合振动分析	肖 祥, 任伟新(41)
基于强度折减系数谱的规则桥梁弹塑性地震反应分析方法	赵冠远, 王 艳, 钟铁毅, 等(48)
千米级跨度铁路桥梁的受力性能研究	徐恭义(56)
地铁站新预筑法施工中顶管间距的优化设计	杨 仙, 张可能, 李 钟, 等(61)
爆破施工隧道围岩稳定性研究	傅洪贤, 赵 勇, 谢晋水, 等(67)
重载货运内燃机车钩缓系统研究	黄成荣, 赵云生, 狄 威, 等(71)
客车车轮型面的多目标优化设计模型研究	成 棣, 王成国, 刘金朝(77)
铁路货车通过曲线轨道时的非线性运动稳定性研究	王开云, 刘鹏飞(85)
100 m 长钢轨普通平车运输道岔及曲线通过问题仿真与试验研究	温克学, 马玉坤, 李善坡, 等(90)
货车装载工况对车辆通过小半径曲线时的垂向平稳性影响	彭永昭, 郎茂祥, 王清校, 等(97)
高速铁路联调联试方法论	王 澜(104)
高速铁路联调联试系统可靠性分析方法的研究	李 琴(110)
判定技术直达去向合理性的静态条件和动态条件方法	田亚明, 林柏梁(116)
基于多层次灰色方法的路企直通运输效果评价方法	梁军平, 彭其渊, 王 莹, 等(121)
铁路通道内客流分担率及客运组织策略研究	吴文娴(126)
基于高斯混合模型的铁路入侵物体目标识别方法	董宏辉, 孙智源, 葛大伟, 等(131)

· 博士学位论文摘要 ·

桥基荷载作用下三维高边坡岩体力学行为及桥基位置确定的研究	王春雷, 谢 强(136)
------------------------------------	---------------

· 成果简报 ·

高强耐磨贝氏体道岔尖轨的研制	刘丰收, 陈朝阳, 张银花, 等(139)
----------------------	-----------------------

· 科技信息 ·

中国铁道科学研究院 2009 年科技成果简介(续四)	徐 上(7)
《高速铁路技术标准体系深化研究》及《铁路重载技术标准体系研究》课题通过铁道部验收	朱 梅, 吴 伟(115)

《中国铁道科学》征订启事	(125)
--------------------	-------

《中国铁道科学》征稿启事	(144)
--------------------	-------

CHINA RAILWAY SCIENCE

Vol. 32 No. 2 (Series No. 116) March 2011

CONTENTS

In-situ Immersion Experimental Study on Railway Subgrade with Collapsible Loess	YAO Jianping, et al (1)
Numerical Simulation on the Engineering Behavior of Embankment over Sloped Weak Ground	LIU Jinnan, et al (8)
Additional Stress Analysis of Upper Soil between Piles in Rigid Pile-Net Composite Foundation	LIU Junfei, et al (15)
Experimental Study on the Transmission Characteristics of Low-Frequency Vibrations Induced by Metro Operation	DING Deyun, et al (20)
Prediction Method of the Vibration Influence on Buildings Induced by Rail Transit	MA Meng, et al (27)
Influence of Different Track Types on the Vibration Response of the Jointly-Built Structure of Subway and the Buildings	ZHOU Meng, et al (33)
Train-Bridge Spatial Coupling Vibration Analysis Based on the Baseline Finite Element Model of the Bridge	XIAO Xiang, et al (41)
Method for the Inelastic Seismic Response Analysis of Regular Bridges Based on Strength Reduction Factor Spectrum	ZHAO Guanyuan, et al (48)
Research on the Mechanical Performance of Railway Bridges with Spans over 1 000 m	XU Gongyi (56)
Optimal Design of Distance between Jacking Pipes of New Pre-Construction Method in Metro Station	YANG Xian, et al (61)
Study on the Stability of the Surrounding Rock of Blasting Construction Tunnel	FU Hongxian, et al (67)
Research on the Coupler and Draft Gear of Heavy-Haul Freight Diesel Locomotive	HUANG Chengrong, et al (71)
Research on the Multi-Objective Optimization Design Model of Wheel Profile for Railway Passenger Car	CHENG Di, et al (77)
Research on the Nonlinear Hunting Stability of Railway Freight Car on Curved Track	WANG Kaiyun, et al (85)
Simulation and Experimental Research on Transporting 100 m Long Steel Rails Using Flatcars Passing Turnouts and Curves	WEN Kexue, et al (90)
Influences of the Loading Conditions on the Vertical Stability of Freight Car Negotiating Small Radius Curved Rails	PENG Yongzhao, et al (97)
The Methodology of High Speed Railway Testing and Commissioning	WANG Lan (104)
Research on the Reliability Analysis Method of the Testing and Commissioning System for High-Speed Railway	LI Qin (110)
The Static Condition and Dynamic Condition for Technical Direct Trains' Rationality Evaluation	TIAN Yaming, et al (116)
Effect Evaluation Method for the Through Transport of Railway Enterprise Based on Multilevel Grey Method	LIANG Junping, et al (121)
Research on the Share Rate of Passenger Flow and Transportation Organization Strategy in Railway Transportation Corridor	WU Wenxian (126)
Target Recognition Method of Railway Invasion Based on Gaussian Mixture Model	DONG Honghui, et al (131)
Study on the Three-Dimensional Mechanical Behaviour of the Rock Mass on High Slope under Bridge Foundation Load and the Determination of Bridge Foundation Position	WANG Chunlei, et al (136)
Development of the Bainitic Switch Rail with High-Strength and Wear-Resistance	LIU Fengshou, et al (139)
