CONTENTS

JOURNAL OF IMAGE AND GRAPHICS

Face recognition method based on frequency cluster (P1166)

Virtual dual-energy subtraction method for X-ray radiographs by using regression model based on chest anatomical structure(P1247)

Seed extraction method for seeded region growing based on one-dimensional spectral differences(P1256)

Image Processing and Coding

- Improved guided image filtering integrated with gradient information
Xie Wei, Zhou Yuqin, You Min 1119
- Fast prediction algorithm of index maps for screen image coding
Chen Guisheng, Song Chuamming, Wang Xianghai, Liu Dan 1127

Image Analysis and Recognition

- Image classification algorithm based on hash codes and space pyramid
Peng Tianqiang, Li Fang 1138
- Fine-grained image categorization with segmentation based on top-down attention map
Feng Yushan, Wang Zilei 1147
- Possibilistic clustering segmentation algorithm based on intra-class and inter-class distance
Liu Lu, Wu Chengmao 1155
- Face recognition method based on frequency cluster
Yuan Heng, Wang Zhihong, Jiang Wentao 1166

Image Understanding and Computer Vision

- Learning performance of convolutional neural networks with different pooling models
Liu Wanjun, Liang Xuejian, Qu Haicheng 1178
- Saliency detection based on lazy random walk
Li Bo, Lu Chunyuan, Jin Lianbao, Leng Chengcai 1191
- Background modeling based on adaptive neighborhood correlation
Wan Jian, Hong Mingjian, Zhao Chenqiu 1202
- Real-time robust feature-point matching algorithm
Chen Tianhua, Wang Fulong 1213
- Dark channel prior-based image dehazing with atmospheric light validation and halo elimination
Zhao Jinwei, Shen Yiyun, Liu Chunxiao, Ouyang Yi 1221

Computer Graphics

- Generation method for a centroidal capacity constrained Power diagram with fixed sites
Zheng Liping, Gao Wencan, Li Shanglin, Cao Li 1229

Medical Image Processing

- Automatic hepatic vessel segmentation algorithm in multi-phase contrast-enhanced CT
Yuan Rong, Shi Shuyue, Xie Qingguo 1238
- Virtual dual-energy subtraction method for X-ray radiographs by using regression model based on chest anatomical structure
Chen Sheng, Zhang Mingwu 1247

Remote Sensing Image Processing

- Seed extraction method for seeded region growing based on one-dimensional spectral differences
Li Xiuxia, Jing Linhai, Li Hui, Tang Yunwei, Ge Wenyan 1256
