

Vol.7 No.4 November 2010
(Quarterly, started in November 2004)

As the transaction for Foundry Institution of Chinese Mechanical Engineering Society (FICMES), *CHINA FOUNDRY*, published quarterly to a worldwide readership in English by Foundry Journal Agency, covers the whole fields of foundry technology for iron, steel and non-ferrous castings, including sand molding casting, die casting, investment casting, etc. It mainly reports advanced scientific and technical achievements, applied technology, successful experiences in production organization, management and leadership, recent developments and industry information. The Foundry Journal Agency is not responsible for statements or opinions advanced by authors of papers or articles printed in the publications. *CHINA FOUNDRY* is indexed by Science Citation Index-Expanded (SCI-E) (available through the Web of Science[®], beginning with the first issue of 2007), Chemical Abstracts (CA), Cambridge Science Abstracts (CSA), Abstract Journal (AJ) and Elsevier's largest abstract and citation database – Scopus and so on.

Contents

Research & Development

- 325** Effects of strontium and boron interactions in Al-7Si alloys
Chen Xiang and Li Yanxiang
- 331** Microstructural evolution of fine-grained ZA27 alloy during partial remelting
Chen Tijun, Fu Mingfeng and Hao Yuan
- 337** Rapid preparation of ceramic moulds for medium-sized superalloy castings with magnesia-phosphate-bonded bauxite-mullite investments
Li Tingzhong Luo Jirong, and Wu Shusen
- 342** Fabrication of quaternary Mg-Zn-Y-Ce quasicrystal alloys and their strengthening effects on AZ91 magnesium alloys
Wang Zhifeng, Zhao Weimin, Li Haipeng, et al
- 349** New filling system design for bolster casting and computer simulation
Zhang Yutuo, Li Guimao, Zhang wannig, et al
- 352** Effect of carbon additions on the microstructure of a single crystal Ni-based superalloy AM3
Yu Zhuhuan, Liu Lin, Zhao Xinbao, et al
- 357** Effect of V and Nb additions on microstructure, properties, and deformability of Ti-45Al-9 (V, Nb, Y) alloy
Yang Fei, Kong Fantao, Chen Yuyong, et al
- 362** Effects of yttrium on microstructure and mechanical properties of Mg-6Al magnesium alloy
Ren Wenliang, Li Quan'an, Li Jianhong, et al
- 367** Numerical simulation of mould filling process for pressure plate and valve handle in LFC
Jiang Junxia, Li Qinliang, Wu Zhichao, et al
- 373** Numerical simulation of interfacial reaction between titanium and zirconia
Liu Aihui, Li Bangsheng, Sui Yanwei, et al
- 377** Effects of harmonic electric field frequency on electromagnetic and flow fields of Ti-Al melt in a rectangular mold based on numerical simulation
Ding Hongsheng, Zhang Yong, Jiang Sanyong, et al

The 69th WFC Papers (2010)

- 383** Advanced manufacturing technologies of large martensitic stainless steel castings with ultra low carbon and high cleanliness
Lou Yanchun and Zhang Zhongqiu
- 392** Energy conservation and emissions reduction strategies in foundry industry
Li Yuanyuan, Chen Weiping, Huang Dan, et al
- 400** Effects of filter materials on the microstructure and mechanical properties of AZ91
Wu Guohua, Sun Ming, Dai Jichun, et al

An Informative Window on China's Foundry Industry

- 408** Application of ceramic short fiber reinforced Al alloy matrix composite to piston for internal combustion engines
Wu Shenqing and Li Jun
- 412** What do we do next;
To survive, grow and be distinguished
Yaylali Günay
- 419** Reduction of greensand emissions by minimum 25% — Case study
Cornelis Grefhorst, Wim Senden, Resat Ilman, et al
- 425** The mystery of molten metal
Natalia Sobczak, Jerzy Sobczak, Rajiv Asthana, et al
- 438** Investigation of improving wear performance of hypereutectic 15%Cr-2%Mo white irons
R. Reda, A. Nofal, Kh, Ibrahim, et al
- 447** Oil quenched malleable iron, the strength of an old material in a "green cast" development and a new future
Cornelis J. van Ettinger
- 456** Structural and thermophysical properties characterization of continuously reinforced cast Al matrix composite
Brian Gordon, Natalia Sobczak, Małgorzata Warmuzek, et al
- 463** Advanced casting technologies for lightweight automotive applications
Alan A. Luo, Anil K. Sachdev and Bob R. Powell

Serial Report

- 470** Colour Metallography of Cast Iron
Chapter 3: Spheroidal Graphite Cast Iron (IV)
Zhou Jiyang, Professor, Dalian University of Technology

Information

- 479** The 69th World Foundry Congress — Conference Report

Subscription and Payment:

Subscription rates:

China: CNY 24, single issue

CNY 96, 4 issues for one year

(includes postage)

Overseas: US \$ 15, single issue

US \$ 60, 4 issues for one year

(includes postage)

The line of paying by T/T is as follows:

Remitting Bank: Bank of America N. A. New York

Swift code: BOFAUS3N

Intermediary Bank: Industrial and Commercial
Bank of China H.O.

Swift code: ICBKCNBJ

A/C No.: 6550790149

Beneficiary's Bank: Industrial and Commercial Bank
of China Liaoning Province Branch

Swift code: ICBKCNBJLNP

Beneficiary's A/C No.: 33010050092640081-18

Beneficiary's Name: Shenyang Research Institute of
Foundry
