P. R. China

Vol.9 No.4 November 2012
(Quarterly, started in August 2004)

As a transaction for Foundry Institution of Chinese Mechanical Engineering Society (FICMES), *CHINA FOUNDRY*, published quarterly to a worldwide readership in English by Foundry Journal Agency, covers the whole fields of foundry technology for iron, steel and non-ferrous castings, including sand molding casting, die casting, investment casting, etc. It mainly reports advanced scientific and technical achievements, applied technology, successful experiences in production, management and leadership, recent development and industry information. The Foundry Journal Agency is not responsible for statements or opinions advanced by authors of papers or articles printed in the publications. *CHINA FOUNDRY* is indexed by Thomson's Science Citation Index-Expanded (SCI-E) (beginning with the first issue of 2007), Chemical Abstracts (CA), Cambridge Science Abstracts (CSA), Abstract Journal (AJ) and Elsevier's largest abstract and citation database - Scopus and so on.

万方数据

Contents

Research & Development

- 307** Study of Ce-modified antibacterial 316L stainless steel
Yuan Junping, Li Wei and Shen Keya
- 313** Effect of tempering temperature on microstructure and mechanical properties of high boron white cast iron
Liu Zhongli, Li Yanxiang and Chen Xiang
- 318** Effect of Mn on hardenability of 25CrMo axle steel by an improved end-quench test
Zhang Yutuo, Bian Shu, and Han Weixin
- 322** Effect of aluminum silicate fiber modification on crack-resistance of a ceramic mould
Lu Dehong, Wang Zhao, Jiang Yehua, et al
- 328** Microstructure characteristics and solidification behavior of wrought aluminum alloy 2024 rheo-diecast with self-inoculation method
Li Yanlei, Li Yuandong, Li Chun, et al
- 337** Preparation and properties of gradient Al_2O_3 - ZrO_2 ceramic foam by centrifugal slip casting method
Li Qiang, Yu Jingyuan, Tang Ji, et al
- 344** Effects of silicon on mechanical properties of AM60 magnesium alloy Effect of yttrium on microstructure and mold filling capacity of a near- α high temperature titanium alloy
Zhao Ertuan, Chen Yuyong, Kong Fantao, et al
- 349** Effect of Mn on microstructures and mechanical properties of Al-Mg-Si-Cu-Cr-V alloy
Zhao Zhihao, Meng Yi, and Cui Jianzhong
- 356** Optimization of a new animal glue binder system cured by CO_2 for use in foundry
Liu Weihua, Zhang Yilin, Li Yingmin, et al
- 360** Research on lamellar structure and micro-hardness of directionally solidified Sn-58Bi eutectic alloy
Hu Xiaowu and Ai Fanrong
- 366** Physical modeling of spent-nuclear-fuel container
Wang Liping, Guo Erjun, Jiang Wenyong, et al

An Informative Window on China's Foundry Industry

- 370** Structure modification and constant remelting speed control of a 120-t three-phase electroslag furnace
Wang Changzhou and Song Jinchun

Overseas Foundry

- 376** Diagnosis parameters of mold filling pattern for optimization of a casting system
Jun-Ho Hong, Young-Sim Choi, Ho-Young Hwang, et al
- 381** Prediction of mechanical properties of Al alloys with change of cooling rate
Quan-Zhi Dong, Young-Sim Choi, Jun-Ho Hong, et al

Information

- 387** Industry News
- 389** Five Recipients of the First and Second China Foundry Lifetime Achievement Award and China Foundry Outstanding Contribution Award
- 395** Visit the Industry Ceremony, Witness the Eternal Moment
— **A report on China Foundry Week 2012**
- 404** Best Photographs at the 3rd "Shengquan Cup" International Foundry Photography Exhibition
