

CHINA FOUNDRY

Vol.14 No. 5 September 2017 中国铸造

Special Issue - MCSP2017

FOUNDRY JOURNAL AGENCY
P. R. China

CONTENTS

Vol.14 No.5 September 2017

The Special Issue features papers from the 10th Pacific Rim International Conference on Modeling of Casting and Solidification Processes (MCSP2017)
Guest Editor: Prof. Shou-mei Xiong

-
- 321 Role of fragmentation in as-cast structure: numerical study and experimental validation
Yong-jian Zheng, Meng-huai Wu, A. Kharicha, et al
- 327 Measurement of temperature inside die and estimation of interfacial heat transfer coefficient in squeeze casting
Fei-fan Wang, Ke-yan Wu, Xu-yang Wang, et al
- 333 Study on accuracy of casting flow simulation
Youngsim Choi, Jun-Ho Hong, Ho-Young Hwang, et al
- 339 Quantitative evaluation of die casting surface defect severity by analyzing surface height
Yan Xu, Naoya Hirata and Koichi Anzai
- 346 Simulation of microstructure evolution in fused-coating additive manufacturing based on phase field approach
Ru-wei Geng, Jun Du, Zheng-ying Wei, et al
- 353 Development of thermophysical calculator for stainless steel casting alloys by using CALPHAD approach
In-Sung Cho, K. D. Savelyev and V. M. Golod
- 359 Simulation of dendritic growth of magnesium alloys with fluid flow
Meng-wu Wu, Zhi-peng Guo and Shou-mei Xiong
- 365 Numerical simulation of central shrinkage crack formation in a 234-t steel ingot
Jing-an Yang, Yue-qiao Wang, Hou-fa Shen, et al
- 373 Phase-field-lattice Boltzmann study for lamellar eutectic growth in a natural convection melt
Ang Zhang, Zhi-peng Guo and Shou-mei Xiong
- 379 Three-dimensional characteristics of Fe-rich intermetallics in gravity-cast Al-6Si alloys
Chen Hu, Wen-feng Luo and Hai-dong Zhao
- 386 Numerical simulation of microstructure evolution on near eutectic spheroidal graphite cast iron
Bing Wu, Di Meng, Hong-liang Zheng, et al
- 392 GPU based numerical simulation of core shooting process
Yi-zhong Zhang, Gao-chun Lu, Chang-jiang Ni, et al
- 398 Multi-scale coupling simulation in directional solidification of superalloy based on cellular automaton-finite difference method
Zhao Guo, Jian-xin Zhou, Ya-jun Yin, et al
- 405 Temperature field simulations during selective laser melting process based on fully threaded tree
Wei Duan, Ya-jun Yin and Jian-xin Zhou
- 412 Numerical simulation of microstructure evolution and microsegregation of U-Nb alloy during solidification process
Bin Su, Zhi-qiang Han, Hong-zhang Deng, et al
- 416 A coupled model on fluid flow, heat transfer and solidification in continuous casting mold
Xu-bin Zhang, Wei Chen and Li-feng Zhang,
- 421 Influence of Ti(C,N) precipitates on austenite growth of micro-alloyed steel during continuous casting
Liu Yang, Yang Li, Zheng-liang Xue, et al
- 429 Effects of hot isostatic pressing temperature on casting shrinkage densification and microstructure of Ti6Al4V alloy
Qian Xu, Jian-xin Zhou, Hai Nan, et al
- 435 Phase field study on crystal orientation effects in eutectoid phase transformation
Dong-qiao Zhang, Ya-jun Yin, Jian-xin Zhou, et al
- 443 Solidification path calculations of Al-Zn-Mg alloys in Al-rich corner
Guang-wei Zhao, Chong Ding, Xin-sheng Gu, et al
- 449 Numerical simulation study on monoblock casting process of ultra-slender structural components and experimental validation
Xu-liang Zhang, Xiu-mei Chi, Bo-dong Zeng,, et al
- 456 Temperature evolution and grain defect formation during single crystal solidification of blade cluster
De-xin Ma, Fu Wang, Qiang Wu, et al
-
