Effect of infiltrating time on interfacial reaction and properties of tungsten particles reinforced Zr-based bulk metallic glass composites

Page 253

CONTENTS

Vol. 17 No. 4 July 2020

Research & Development

- 253 Effect of infiltrating time on interfacial reaction and properties of tungsten particles reinforced Zr-based bulk metallic glass composites
Qing-chun Xiang, Zhi-bo Feng, Wei Zhang, et al
- 260 Precipitation and evolution of nodular graphite during solidification process of ductile iron
Jin-hai Liu, Jian-shuai Yan, Xue-bo Zhao, et al
- 272 Microstructural analysis of EN-GJS-450-10 ductile cast iron via vibrational casting
Çağlar Yüksel
- 279 Influence of periodic pressure on dendritic morphology and sidebranching
Shan Shang, Zhi-peng Guo, Zhi-qiang Han, et al
- 286 Microstructure evolution of Ti_5Si_3 in Cu-Ti-Si alloys
Qing Liu, Xiao-cui Zhang, Qiang Wang, et al
- 293 Effect of growth rate on microstructure and microhardness of directionally solidified Ti-44Al-5Nb-1.5Cr-1.5Zr-1Mo-0.1B alloy
Zhi-ping Li, Hong-ying Xia, Liang-shun Luo, et al
- 301 Phase field simulation of liquid-solid-eutectoid multiple phase transformations of a Fe-C binary alloy
Li Feng, Jun-he Zhong, Chang-sheng Zhu, et al

- 308 Performance of digital patternless freeze-casting sand mould
Zhong-de Shan, Hao-qin Yang, Feng Liu, et al
- 314 Three dimensional modeling method of MIMICS adjacent mask spherical open cell aluminum foam-polyurethane composites based on DICOM data
Ming-si Qi, Wei Zhang, Guang-ming Ren, et al

Information

- 320 Introduction to patents
- 323 Post report on CHINA DIECASTING & CHINA NONFERROUS 2020
